## Abstracts

Empresas ICA, S.A.B. de C.V. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Empresas ICA, S.A.B. de C.V. and its competitors. This provides our Clients with a clear understanding of Empresas ICA, S.A.B. de C.V. position in the [Engineering and Construction Services](#) Industry.

The report contains detailed information about Empresas ICA, S.A.B. de C.V. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Empresas ICA, S.A.B. de C.V.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Empresas ICA, S.A.B. de C.V. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Empresas ICA, S.A.B. de C.V. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Empresas ICA, S.A.B. de C.V. business.

### **About Empresas ICA, S.A.B. de C.V.**

Empresas ICA, S.A.B. de C.V., through its subsidiaries, operates as an engineering, procurement and construction company in Mexico. The company provides construction services to both public and private-sector clients.

The company engages in a range of construction and related activities, involving the construction of infrastructure facilities, as well as industrial, urban and housing construction. It also engages in the development and marketing of real estate, the construction, maintenance and operation of airports, highways, bridges and tunnels; and in the management and operation of water supply systems, and solid waste disposal systems under concessions granted by governmental authorities.

### Segments

#### CONSTRUCTION

The Construction Segment is divided into three divisions: Civil Construction, Industrial Construction, and Rodio Kronsa. These divisions provide a range of services, including feasibility studies, conceptual design, engineering, procurement, project and

construction management, construction, maintenance, technical site evaluations, and other consulting services.

## Civil Construction

The Civil Construction Division focuses on infrastructure projects in Mexico, including the construction of roads, highways, transportation facilities (such as mass transit systems), bridges, dams, hydroelectric plants, tunnels, canals and airports, as well as on the construction, development and remodeling of multi-storied urban buildings, including office buildings, hotels, multiple-dwelling housing developments and shopping centers. The Civil Construction Division has also pursued opportunities in other parts of Latin America, the Caribbean, Asia, and the United States. The division performs activities, such as demolition, clearing, excavation, de-watering, drainage, embankment fill, structural concrete construction, concrete and asphalt paving, and tunneling. The company has played an active role in the development of Mexico's infrastructure and has completed infrastructure facilities and constructed buildings throughout Mexico and Latin America.

## Industrial Construction

The Industrial Construction Division focuses on the engineering, procurement, construction, design, and commissioning of manufacturing facilities, such as power plants, chemical plants, petrochemical plants, fertilizer plants, pharmaceutical plants, steel mills, paper mills, drilling platforms, and automobile and cement factories.

The company has an alliance with Fluor Daniel Mexico, S.A., which provides it with a range of business opportunities in the industrial construction markets in and outside Mexico, as well as access to technology and know-how.

**Typical Projects:** Projects in its Industrial Construction division typically involve engineering techniques and require it to fulfill complicated technical and quality specifications. Among the principal projects that the company has completed in the division are: the Pemex Cayo Arcos offshore housing platform; the second phase of the Indelpro PP Line and Splitter; the Pemex Yaxche B and Kab A Light Platforms; and the Pemex Reynosa V plant.

**Turnkey Projects:** A turnkey project in this division is the contract for the construction of the first Mexican liquefied natural gas (LNG) regasification terminal for Terminal de LNG de Altamira S. de R.L. de C.V., a joint venture owned by the Royal Dutch/Shell Group,

Mitsui Corp and the Total Group. Other turnkey projects include a cogeneration power plant for Enertek; an oxygen plant for Altos Hornos de Mexico, S.A. de C.V.; a silica plant for PPG; a cryogenic gas processing facility for Pemex; a cement plant for Cementos Apasco; a combined cycle power plant for AES Andres; a combined cycle power plant for Semptra; a combined cycle power plant for Transalta; and three combined cycle power plants for Iberdrola.

Clients: The division's public sector clients are Pemex Exploracion y Produccion; Pemex Refinacion; and Pemex Gas y Petroquimica Basica. In the private sector the division's major clients are Dowell Schlumberger de Mexico, S.A. de C.V.; Altos Hornos de Mexico, S.A. de C.V.; and Energia Costa Azul, S. de R.L.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
