The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Emtec Inc. business.

About Emtec Inc.

Emtec, Inc., an information technology (IT) services provider, provides consulting, application services, and infrastructure services to public sector and commercial clients.

Services

The company provides its clients with an array of technology services, including IT infrastructure and process consulting; development, implementation, and maintenance and support of custom and packaged business applications; planning, managing, maintaining, and supporting IT infrastructure; aligning their IT infrastructure with the needs of their businesses and operations; and advice, design and selection of their business process technology needs. The company also provides its clients with IT staff augmentation needs in a select set of business application skills.

Strategic IT Consulting

The company provides consulting around managing technology and business transformation, information management strategies, security and compliance and risk management services. It helps clients to address business and technology issues in the areas of information technology optimization and value extraction, integrated business and technology architecture, process and planning, and transformational program

management. The company provides solutions for business and technology problems, such as information management, transformational technology platforms, supply chain processes, and data analytics.

Business Application Services

The company works with its clients to analyze and redesign their business processes, identify new process requirements, select business applications that are engineered to best fit their processes, implement support and maintain their business applications. It delivers these services through project consulting assignments and staff augmentations. The company has associates skilled in process redesign and analysis, custom application development, independent validation and verification (quality assurance and testing), enterprise resource planning (ERP) and CRM solutions, and information management (business intelligence, analytics, and data warehousing), and Web-based business applications.

Infrastructure Consulting Services

The company's infrastructure consulting services are designed to align the needs of its clients' CIOs and IT organizations with the needs of their businesses. It offers these services in the following areas:

IT Business Alignment and Planning Services: These services help clients see the value that IT provides to the organization creating cost savings in IT through management of projects and focus on IT service management.

IT Operations and Support Services: The company's services are designed to provide clients with tools and methods to improve internal IT service delivery.

IT Practices & Governance: Using an information technology infrastructure library (ITIL), the company assists clients to measure and assess their IT performance against their peer groups. Its services also include strategies for implementation, improvement, and continued governance to maintain an IT department that follows best practices.

Data Storage Solutions: The company offers storage needs assessments, solution recommendations with hardware, software and implementation project requirements, implementation and integration services, post-sales training, maintenance, and support services.

Infrastructure Managed Services

The company's managed infrastructure services provide ongoing monitoring and support of its clients' networks through the utilization of help desk and network monitoring services, as well as through its own on-site engineering resources. It offers these services in following areas:

Lifecycle Management Services: The company's lifecycle management services are designed to provide clients with continuous availability of service and support throughout the lifecycle of their IT investments, including the IT product acquisition and support services needed to support server environments. The company's services include evaluation and prioritization of business objectives to determine the best course of action for its clients; consultation with clients to identify the right IT products an

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
