The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Enable Holdings, Inc. business.

About Enable Holdings, Inc.

Enable Holdings, Inc. operates on-line Web sites that enable manufacturers, retailers, and distributors to liquidate excess inventory by providing them with asset recovery solutions.

Business Units

uBid.com: The company's primary Web Site allows merchants to sell excess inventory and allows consumers to buy products online in an auction price format.

RedTag.com: The company's fixed price Internet site offers name brand merchandise.

RedTag Live: The company's live liquidation group is dedicated to selling through the traditional in-store sales and live liquidation sales.

Dibu Trading Company: This is a wholesale inventory liquidation company offering business-to-business solutions, providing manufacturers and distributors the ability to sell excess inventory.

Commerce Innovations: A software service company which licenses auction software to

third party companies. Companies, businesses and governments can use the company's platform to sell excess furniture, appliances, autos, and other surplus.

Products and Merchandising

The company, through its Web sites, offers approximately 200,000 brand-name, new, close-out, overstock and recertified merchandise in approximately 200 categories including personal computers, consumer electronics, apparel, house wares, watches, jewelry, travel, sporting goods, home improvement products, and collectible products.

Personal Computer Products: Personal Computer Products include items, such as desktops, portable computers, computer accessories, disk drives, modems, monitors/video equipment, components, printers, scanners, digital cameras and accessories, software, and home office products.

Consumer Electronics: Consumer Electronics include items, such as home theater equipment, home audio equipment, speakers, televisions, camcorders, digital cameras, VCRs, DVD players, portable audio players, and automobile audio equipment.

Home: Home category includes items, such as appliances, vacuum cleaners, furniture, tools, luggage, furnishings, art, and lawn and garden.

Jewelry and Gifts: Jewelry and Gifts include items, such as rings, earrings, watches, bracelets, and loose stones.

Apparel and Accessories: Apparel and Accessories include items, such as men's, women's, and children's casual, fitness, and dress clothing, shoes and accessories.

Sporting Goods and Memorabilia: Sporting Goods and Memorabilia include items, such as sports memorabilia and collectibles, equipment for golf, tennis, health and fitness, outdoor sports, bicycles, water sports, and team sports.

Books, Music and Videos: These items include books, movies, video games, DVDs, and CDs.

Collectibles: Collectibles include items, such as dolls, stamps, coins, pottery, glass, and figurines.

Competition

The company faces competition from liquidators, asset recovery companies and retailers that can be divided into two categories: online liquidators and retailers, such as Overstock.com, Ecost.com, Bluefly.com, Amazon.com, Smartbargains.com, and Bidz.com; and in-store liquidators, such as Gordon Brothers and Hilco Trading Co.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
