Abstracts

Enbridge Energy Partners LP Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Enbridge Energy Partners LP and its competitors. This provides our Clients with a clear understanding of Enbridge Energy Partners LP position in the [Energy](#) Industry.

The report contains detailed information about Enbridge Energy Partners LP that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Enbridge Energy Partners LP. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Enbridge Energy Partners LP financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Enbridge Energy Partners LP competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Enbridge Energy Partners LP business.

About Enbridge Energy Partners LP

Enbridge Energy Partners, L.P. owns and operates crude oil and liquid petroleum transportation and storage assets, and natural gas gathering, treating, processing, transportation, and marketing assets in the United States of America. Enbridge Energy Company, Inc. serves as the general partner of the company.

As of December 31, 2009, the company's portfolio of assets included the following: approximately 5,900 miles of crude oil gathering and transportation lines and 28.9 million barrels, or Bbl, of crude oil storage and terminaling capacity; natural gas gathering and transportation lines totaling approximately 10,000 miles; 9 natural gas treating and 22 natural gas processing facilities with an aggregate capacity of approximately 2,900 million cubic feet per day, or MMcf/d; and marketing assets that provide natural gas supply, transmission, storage and sales services.

Segments

The company conducts its business through three business segments: Liquids; Natural Gas; and Marketing.

LIQUIDS

Liquids segment includes the Lakehead, North Dakota, and the Mid-Continent crude oil systems.

Lakehead system

Lakehead system consists of a series of interstate common carrier crude oil and liquid petroleum pipelines that are regulated by the Federal Energy Regulatory Commission, or FERC, and storage assets, all of which are located in the Great Lakes and Midwest regions of the United States. The Lakehead system spans approximately 1,900 miles and includes approximately 4,700 miles of pipe and is the primary transporter of crude oil and liquid petroleum from western Canada to the United States. The Lakehead system serves all the refining centers in the Great Lakes and Midwest regions of the United States and the province of Ontario, Canada.

Customers: During 2009, approximately 36 shippers tendered crude oil and liquid petroleum for delivery through its Lakehead system. The company's customers include integrated oil companies, independent oil producers, refiners, and marketers.

Mid-Continent system

The company's Mid-Continent system consists of approximately 480 miles of active crude oil pipelines, including the FERC-regulated Ozark pipeline and approximately 15.9 million barrels of storage capacity, which serve refineries in the U.S. Mid-continent region from Cushing, Oklahoma.

The company's Ozark pipeline transports crude oil from Cushing to Wood River where it delivers to ConocoPhillips' Wood River refinery and interconnects with the WoodPat Pipeline, and the Wood River Pipeline, each owned by unrelated parties. The company's West Tulsa pipeline moves crude oil from Cushing to Tulsa, Oklahoma where it delivers to Holly Corporation's Tulsa refinery, formally owned by Sinclair Oil Corporation. The storage terminals consist of 96 individual storage tanks ranging in size from 55,000 to 575,000 barrels.

Customers: During 2009, approximately 37 shippers tendered crude oil for service by its Mid-Continent system. Its customers include integrated oil companies, independent oil producers, refiners, and marketers.

North Dakota system

The company's North Dakota system includes approximately 240 miles of crude oil gathering lines connected to an interstate transportation line that is approximately 730 miles long and is regulated by the FERC. The North Dakota system connects directly into the Lakehead system in the state of Minnesota.

The company's North Dakota system is a crude oil gathering and interstate transportation system servicing the Williston Basin in North Dakota and Montana. The crude oil gathering pipelines of its North Dakota system collect crude oil from points near producing wells in approximately 22 oil fields in North Dakota and Montana. Most deliveries from its North Dakota system are made at Clearbrook to its Lakehead system and to a third-party pipeline system. The company's North Dakota system includes approximately 240 miles of crude oil gathering lines connected to a transportation line that is approximately 730 miles long, with a capacity of approximately 161,000 Bpd. The company's North Dakota system also has 21 pump stations, 1 delivery station, and 11 terminaling facilities wit

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
