The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Encore Energy Partners LP business.

About Encore Energy Partners LP

Encore Energy Partners LP engages in the acquisition, exploitation, and development of oil and natural gas properties. Encore Energy Partners GP LLC serves as the general partner of the company.

As of December 31, 2009, the company's estimated total proved reserves were 28.9 MMBbls of oil and 84.7 Bcf of natural gas. It also had 1,099 operated wells and 1,644 non-operated wells.

Properties

The company's properties and oil and natural gas reserves are located in the Big Horn Basin in Wyoming and Montana; the Permian Basin in west Texas and New Mexico; the Williston Basin in North Dakota and Montana; and the Arkoma Basin in Arkansas and Oklahoma.

Big Horn Basin Properties

The company's Big Horn Basin properties, which include its Elk Basin Assets and the Gooseberry field, are located in northwestern Wyoming and south central Montana.

Elk Basin Properties: The company's properties in the Elk Basin area are located in the Elk Basin field, Northwest Elk Basin field, and the South Elk Basin field. The major producing horizons in these fields are the Embar-Tensleep, Madison, Frontier, and Big Horn formations.

The company's properties in the Elk Basin area include 16,267 gross acres (13,360 net) located in Park County, Wyoming and Carbon County, Montana. All of its production in the Elk Basin area is operated.

The company also owns and operates the Elk Basin natural gas processing plant near Powell, Wyoming; the Clearfork crude oil pipeline extending from the South Elk Basin field to the Elk Basin field in Wyoming; the Wildhorse natural gas gathering system that transports low sulfur natural gas from the Elk Basin and South Elk Basin fields to its Elk Basin natural gas processing plant; and a small natural gas gathering system that transports high sulfur natural gas from the Elk Basin field to its Elk Basin natural gas processing facility.

Other Oil and Natural Gas Properties: The company also operates wells in the Big Horn, Embar-Tensleep, and Madison formations in the Northwest Elk Basin field and in the Embar-Tensleep, Middle Frontier, Torchlight, and Peay Sand formations in the South Elk Basin field. It holds an average 83 percent working interest and an average 71 percent net revenue interest in its wells in these fields.

Natural Gas Processing Plant: The company operates and owns a 62 percent interest in the Elk Basin natural gas processing plant near Powell, Wyoming. ExxonMobil Corporation owns a 34 percent interest in the Elk Basin natural gas processing plant, and other parties own the remaining 4 percent interest.

Pipelines: The company owns and operates one crude oil pipeline system and two natural gas gathering pipeline systems. The Clearfork pipeline receives crude oil from various interconnections with local gathering systems. The company also owns a small natural gas gathering system that transports approximately 13.5 MMcf/D of high sulfur natural gas from the Elk Basin field to its Elk Basin natural gas processing plant.

Gooseberry Field: Gooseberry field is made up of two waterflood units in the Big Horn Basin. The field is located 60 miles south of Elk Basin in Wyoming and consists of 23 active producing wells. Gooseberry is an active waterflood project. The company holds all working interest and an average 90 percent net revenue interest in its wells in the

Gooseberry field.

Williston Basin Properties

The company's Williston Basin properties include: Horse Creek, Charlson Madison Unit, Elk, Cedar Creek MT, Lookout Butte East, Pine, Beaver Creek, Buffalo Wallow, Buford, Crane, Charlie Creek, Dickinson, Elm Coulee, Lone Butte, Lonetree Creek, Missouri Ridge, Tracy Mountain, Tract Mountain Fryburg, Treetop, Trenton, and Whiskey Joe. The Horse Creek field is located in Bowman County, North Dakota and has producing oil wells from multiple horizons in the Red River formation. The Charlson Madison Unit produces from the unitized Madison formation. The Elk field is operated and produces from wells in McKenzie County, North Dakota.

Permian Basin Properties

The Permian Basin is an oil and natural gas producing basin in the United States. The Permian Basin extends approximat

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
