Abstracts

Endeavour International Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Endeavour International Corporation and its competitors. This provides our Clients with a clear understanding of Endeavour International Corporation position in the [Energy](#) Industry.

The report contains detailed information about Endeavour International Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Endeavour International Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Endeavour International Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Endeavour International Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Endeavour International Corporation business.

About Endeavour International Corporation

Endeavour International Corporation, an independent oil and gas company, engages in the acquisition, exploration, and development of energy reserves in the United States and the United Kingdom.

Areas of Operation

North Sea

The company's development assets in the Bacchus, Columbus, Cygnus, and Rochelle fields comprise the primary component of its U.K. North Sea portfolio. It also holds interests in producing and non-producing properties in the U.K. sector of the North Sea. The company's producing properties include the Alba, Bittern, Enoch, and Goldeneye fields.

Primary Development Fields

Rochelle: The company holds a 55.6% working interest in and operate its Rochelle field

assets. Its interests in the Rochelle field account for 6.3 MMBOE of its proved reserves as of December 31, 2009.

Cygnus: The company holds a 12.5% working interest in its Cygnus field assets, which are operated by Gaz de France. Its interests in the Cygnus field account for 5.7 MMBOE of its proved reserves as of December 31, 2009.

Columbus: The company holds a 25% working interest in its Columbus field assets, which are operated by Serica Energy plc. Its interests in the Columbus field account for 1.8 MMBOE of its proved reserves as of December 31, 2009.

Bacchus: The company holds a 10% working interest in its Bacchus field assets, which are operated by Apache Corporation.

Producing Fields

The company has four producing fields in the U.K. – Alba, Bittern, Enoch and Goldeneye. Combined these fields held 2.5 MMBOE of proved reserves as of December 31, 2009.

The United States

As of March 16, 2010, the company's U.S. acreage consisted of approximately 165,000 net acres. In addition, its U.S. acreage covers a spectrum of resource plays, from explored areas, such as the Haynesville and Marcellus Shales, to frontier areas, in Alabama and Montana.

Haynesville Shale

The Haynesville Shale is a natural gas play in the U.S. The company has acquired interests in both producing wells and acreage that is prospective for the Haynesville Shale. In October 2009, the company purchased 50% of Cohort's working interest in 24 wells located in five fields and certain proved undeveloped locations associated with Cohort's proved developed assets in North Louisiana and East Texas. These 24 wells are associated with net proved reserves of approximately 1.6 MMBOE. In addition to these wells, through its joint venture with Cohort Energy, the company holds interests in approximately 17,700 gross (7,250 net) acres with Haynesville Shale potential. In connection with this acreage, the company has identified approximately 200 potential drilling locations. Of this acreage, approximately 13,500 gross (5,800 net) acres are

located in the Haynesville Shale core area in Louisiana with approximately 150 potential drilling locations.

The company's new Haynesville well in Red River Parish, Louisiana, the Indigo Minerals 3#1-H, has produced approximately 2 Bcf (gross) of gas. It is drilling the Bachelor 3#1-H as a direct offset to the Indigo Minerals well. The company is also drilling the Longview North 1H in Gregg County, Texas as a horizontal Cotton Valley Sandstone test.

Marcellus Shale

The Marcellus Shale is a Middle Devonian-aged shale that underlies much of Pennsylvania, New York, Ohio, West Virginia, and adjacent states. As with its Haynesville Shale acreage, the company has acquired its interests in the Marcellus Shale through a 50/50 joint venture relationship with Cohort Energy/J-W Operating who would operate the project. It acquired interests in approximately 48,300 gross (19,750 net) acres prospective for the Marcellus Shale in various project areas, including portions of Cameron, Elk, Potter, McKean, Jefferson, and Clarion counties, Pennsylvania. In connection with this acreage, the company has approximately 300 potential drilling locations.

Alabama Gas Shales

Through its joint venture with Hillwood Energy Alabama LP, an affiliate of Hillwood International Energy, the company holds a 50% non-operating interest in approximately 160,000 gross (63,000 net) acres with exposure to emerging gas shale plays in western Alabama.

Central Montana Oil-prone Shales

Through its joint venture with a private company, the company owns a 25% non-operating interest in approximately 300,000 gross (75,000 net) acres in central Montana. The company's acreage contains approximately 900 potential drilling locations and has exposure to both the Mississippian Heath and Devonian Bakken oil-prone source shales.

Customers

The company's sales in the U.K. are to customers, such as Chevron North Sea Ltd;

Shell U.K. Limited, and Esso Exploration and Production. Its sales in the U.S. are sold through its arrangements with the operators of the fields, with majority of the sales being to Cohort Energy.

Dispositions

In May 2009, the company completed the divestiture of its Norwegian subsidiary, Endeavour Energy Norge AS, to VerbundnetzGas AG, a German utility company.

History

Endeavour International Corporation was founded in 2000.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
