Abstracts

Energenx Inc Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Energenx Inc and its competitors. This provides our Clients with a clear understanding of Energenx Inc position in the [Electrical Equipment](#) Industry.

The report contains detailed information about Energenx Inc that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Energenx Inc. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Energenx Inc financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes Energenx Inc competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Energenx Inc business.

About Energenx Inc

Energenx, Inc., a technology-based company, engages in the discovery, research, and development of electromagnetic motor/generator and battery rejuvenator/charger systems. The company develops these systems, using proprietary technology based on a hybrid electromagnetic motor/generator and on a two phase solid state battery charger that uses a method for pulse charging batteries.

Research and Product Development Programs

Solid State Pulse Battery Chargers: The company's pulse charging solid state battery charger system uses a two phase method to charge batteries with pulsating current. This device uses a timed electrical pulse to create a waveform in a direct electrical pulse to be discharged into the battery receiving the charge.

Battery Charger Products: The company developed a solid state pulse battery charging system called the potential battery charger designed to charge electric powered vehicles, such as golf carts, ATVs, forklifts, and back-up battery systems. It developed a 36 volt version of the potential battery charger designed for use in golf carts and forklifts.

Battery Charger/Rejuvenators: The company developed combination battery chargers

and rejuvenators based on process using unidirectional wave impulses that rejuvenate batteries. In addition, the company developed a 12/24 volt battery charger/rejuvenator for charging and rejuvenation of lead acid batteries.

The company also develops the following charger/rejuvenator products: 12 volt charger/rejuvenator for lead-acid, gel-cell, and Absorbed Glass Mat (AGM) batteries used in trucks, autos, motorcycles, marine craft, and recreational vehicles to be marketed to repair shops and dealerships; universal battery charger/rejuvenator for nickel-cadmium and nickel-metal hydride, lead acid primary cells, and tool batteries between 1.5 and 24 volts used in cordless power tools, phones, toys, and back up uninterruptible power supply supplies; 72-144 volt battery charger/rejuvenator for electric vehicles and hybrids; and 12/24 volt solar/wind charge controller for use with lead-acid, gel-cell, nickel-metal hydride, and AGM battery banks utilized in conjunction with solar and/or wind power.

Battery Charge Control Unit for Renewable Energy System Storage Batteries: Using the battery charging technology base as utilized in its battery chargers, the company builds field testing a prototype of a battery charge control unit for use with residential solar and wind powered electric systems, called the solar kick radiant charge controller. The solar kick charge controller is a 12 and 24 volt variation of the proprietary battery chargers that use digital circuitry to monitor and switch the charge between two banks of batteries.

Electromagnetic Motor/Generator Battery Energy System: The hybrid electromagnetic motor generator produces mechanical energy using electrical energy pulses from a primary bank of batteries (or another source of electricity) and recharges a second bank of batteries simultaneously. The charging and discharge of the banks of batteries are cycled so that at any given point in time, one bank of batteries is charging the other bank of batteries while it also utilizes excess energy to provide electrical current, via a direct current/alternating inverter, to be consumed for other purposes.

Strategic Alliance

The company has a technology license agreement with GTG Corp., which intends to test the sublicensed prototype battery charger known as the potential battery charger.

Competition

The company's competitors include Exide International; Coleman; LVS Sales;

Diversified Power International, LLC; EZ-GO, Inc.; Lester and Associated; Powerwise (a division of EZGO Textron); Lester and VDC Electronics (a subsidiary of AreoVironment); Japlar Schauer; VDC Electronics, Inc.; Deltran; Iota Engineering; Stontronics; and Xantrex.

History

Energenx, Inc. was incorporated in 1999.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
