The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Energy Partners Ltd. business.

About Energy Partners Ltd.

Energy Partners, Ltd. operates as an independent oil and natural gas exploration and production company. The company's operations are concentrated in the shallow to moderate-depth waters in the Gulf of Mexico focusing on the areas offshore Louisiana, as well as the deepwater Gulf of Mexico.

The company produces both oil and natural gas. As of December 31, 2009, it had estimated proved reserves of approximately 19.9 million barrels (Mmbbls) of oil and 67.4 billion cubic feet (Bcf) of natural gas, or an aggregate of approximately 31.2 million barrels of oil equivalent (Mmboe).

Properties

As of December 31, 2009, the company had working interests in 20 producing fields, primarily located in the Gulf of Mexico region.

Gulf of Mexico Shelf

The Gulf of Mexico Shelf includes Eastern offshore area—comprising primarily two producing fields, its East Bay and Main Pass fields; Central offshore area—comprising

five producing fields, all of which are located in close proximity to each other and are in the vicinity of the Bay Marchand salt dome (the Greater Bay Marchand area); and Western offshore area—comprising 10 producing fields extending from offshore central and western Louisiana to Texas.

The company's East Bay field, the key asset in its Eastern offshore area, is located 89 miles southeast of New Orleans near the mouth of the Mississippi River. It contains producing wells located onshore along the coastline and in water depths ranging up to approximately 170 feet and is comprised of the South Pass 24, 26 and 27 fields. The company operates this field and owns an average 99% interest in its acreage position in this area. The company's leasehold area covered 33,154 gross acres (32,967 net acres) as of December 31, 2009.

The company's key assets in Central offshore area include the South Timbalier 26, 41 and 46 blocks and the Bay Marchand field located approximately 60 miles south of New Orleans in water depths of 181 feet or less. It has drilled its initial discovery well in the South Timbalier 41 field, in which it holds a 60% working interest. The company owns a 100% interest in the producing horizons in South Timbalier 26 field. The properties in the Western offshore area are located in water depths ranging from 7 to 272 feet with working interests ranging from 20% to 100%.

Deepwater Gulf of Mexico

As of December 31, 2009, the company owned interests in 22 blocks in the deepwater Gulf of Mexico area, including one well at Mississippi Canyon Block 248. Its working interests in its leases in this area ranged from 15% to 33%.

Customers

The company's major customers include Shell Trading (US) Company; ChevronTexaco Exploration & Production Company; and Louis Dreyfus Energy Services, L.P.

History

Energy Partners, Ltd. was founded in 1998.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
