Abstracts

Energy Quest, Inc Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Energy Quest, Inc and its competitors. This provides our Clients with a clear understanding of Energy Quest, Inc position in the [Utilities](#) Industry.

The report contains detailed information about Energy Quest, Inc that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Energy Quest, Inc. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Energy Quest, Inc financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Energy Quest, Inc competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Energy Quest, Inc business.

About Energy Quest, Inc

Energy Quest Inc., a development stage company, engages in the development and production of hydrogen-enriched alternative fuels in an environmentally responsible manner. The company intends to employ gasification technologies and catalytic conversion processes to produce clean fuels.

Products and Services

The company designs, builds, leases, and operates the following gasification technologies with potential application within the energy field: Pyrolysis Steam Reformer (PyStR), which utilizes steam for reforming of coal and other carbonaceous feedstocks, and separates hydrogen and carbon dioxide into separate streams; M2 Fluidized Bed Gas Generator (M2), an air blown fluid bed gasifier which converts waste solid fuel sources into gaseous form; and Modular Advanced Controlled Air Incinerator, which allows for incineration of waste, and is suited to medical waste and moderately prepared municipal waste.

Pyrolysis Steam Reformer (PyStR)

The company, through its wholly owned subsidiary Syngas Energy Corp., has licenses

to develop, produce and market Pyrolysis Steam Reformer (PyStR). It has obtained the rights to a hydrogen generation technology referred to as the PyStR (Pyrolitic Steam Reforming) process. This process can directly produce hydrogen from biomass and other carbonaceous feed-stocks, such as oil sands, coal and petroleum coke. The PyStR technology involves the simultaneous pyrolysis and steam reforming of any carbon-based material. Its products include separate streams of hydrogen, carbon dioxide and nitrogen produced in a stainless steel or refractory lined vessel.

The company has completed carbon dioxide sequestration technology, a component of its PyStR technology. The PyStR technology captures carbon dioxide that is commonly accepted to be responsible for global warming. The PyStR hydrogen production process is used in wells that have already passed through primary production, where natural pressure in the well pushes out the oil, and in wells that have passed secondary production using water or natural gas flooding. The company intends to use its PyStR and catalytic process to produce butanol from carbon based feedstocks.

M2 Fluidized Bed Gas Generator (Gasifier) (M2)

The M2 Fluidized Bed Gas Generator (M2) is an air blown fluid bed gasifier which converts waste solid fuel sources into gaseous form. The M2 gas produced can be used in boilers, kilns, and furnaces to offset the use of natural gas.

Modular Advanced Controlled Air Incinerator

The company has developed a Modular, Controlled Air, Factory Built, and Packaged incinerator. The unit is a Starved Ignition Chamber, Excess Air Combustion Chamber. The integrated design of the ignition chamber, flame port, and combustion chamber allows proper and constant gas velocities to insure proper air/fuel (waste) ratios for optimum combustion efficiency. The units are suited for medical waste and moderately prepared municipal waste disposal.

Licensing Agreements

The company has a licensing agreement with Re-Gen International Corporation. Under the terms of the agreement, it agreed to grant licensing rights for its gasification technology in the United States of America.

The company has a licensing agreement with Beaufort Energy Solutions, Inc. Under the terms of the agreement, it agreed to grant licensing rights for its gasification technology

in the Province of British Columbia, Canada.

The company has a licensing agreement with Poly-Pacific International, Inc. According to the agreement, it agreed to grant licensing rights for its gasification technology in the territory of Ontario, Canada.

Customers

The company's customers include Poly-Pacific International, I-Coda, Northern Alberta Oil Ltd., and Beaufort Energy.

Competition

The company's competitors include Energy Products of Idaho, USA; General Electric, USA; FERCO (Battelle), U.S.A; Lurgi, Germany; and Foster-Wheeler (Outokumpu), Finland.

History

Energy Quest Inc. was founded in 2004.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
