The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of inherent Corp. business.

About inherent Corp.

inherent Corp. operates as an information technology (IT) services company in the northeastern United States.

The company provides its clients with consultative resources, including technology staffing; and teams of technical consultants trained in the delivery of solutions related to systems integration, network and security, advanced analytics, enterprise content management, infrastructure solutions, and application services. Its technology platforms include legacy systems, as well as client server, Internet, and network solutions.

Services

Information Technology Consultative Resource and Staffing Services: The company provides information technology professionals to augment client resource demands. Consultative and staffing resources may be used to undertake a role on a long-term strategic project or fill a short-term need for a technology skill set. Areas of services include project management, business analysis, systems architecture and design, database architecture and design, application code development, network engineering, quality assurance, and testing.

Systems Integration: The company conducts application, data, and technical assessments to determine if there are gaps in the existing environment relative to the business vision. enherent makes recommendations to address the gaps by leveraging existing information technology assets and deploying a combination of application code development, software product implementation and computer equipment, to integrate new capabilities into the environment to address the gaps. Support includes project management, technical, application and data architects and modelers, application developers, and network engineers.

Application Development: The company conducts planning, design, application code development, testing, and deployment of enhancements to existing systems or new custom application development. Application development may include the evaluation and implementation of third party business application software. Custom applications can be developed at the client site or off-site based on client requirements.

Network and Security Services: The company provides planning, architecture, design, and engineering services to support the build out, optimization, and security audits of the network infrastructure.

Advanced Analytics: The company uses text analytics technology to understand and process free-form text. The analysis of text offers government and commercial organizations the opportunity to use information contained in text, including: email, documents, call center notes, forums, Blogs, surveys, and others. This form of analytics combines text or unstructured data with traditional forms of structured data to deliver actionable intelligence that is otherwise unavailable without manual effort.

Target Markets

The company focuses its marketing efforts for information technology services primarily on Fortune 1000 companies and those commercial and federal systems integrators with significant information technology and application development service needs. It also focuses its marketing efforts for solutions services, software license sales and computer equipment sales in the middle market. Clients include companies in banking and capital markets, insurance, healthcare, pharmaceutical, consumer goods, and other industries.

Customers

The company's major customers include New York City Department of Homeless Services; Mass Mutual; Deloitte; Aetna; and SAIC.

Competition

The company's competitors include Albano Systems, Inc., Cognizant Technology Solutions Corporation, Computer Task Group, iGate Corp, Prolifics, and TEK systems.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
