Abstracts

EnPro Industries, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between EnPro Industries, Inc. and its competitors. This provides our Clients with a clear understanding of EnPro Industries, Inc. position in the [Heavy Machinery](#) Industry.

The report contains detailed information about EnPro Industries, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for EnPro Industries, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The EnPro Industries, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes EnPro Industries, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of EnPro Industries, Inc. business.

About EnPro Industries, Inc.

EnPro Industries, Inc. engages in the design, development, manufacturing, and marketing of proprietary engineered industrial products.

Segments

The company manages its business as three segments: Sealing Products Segment; Engineered Products Segment; and Engine Products and Services Segment.

SEALING PRODUCTS SEGMENT

The Sealing Products segment designs, manufactures, and sells sealing products, including metallic, non-metallic and composite material gaskets, rotary seals, compression packing, resilient metal seals, elastomeric seals, hydraulic components, and expansion joints, as well as heavy-duty wheel-end components and component systems, polytetrafluoroethylene (PTFE) products, conveyor belting and sheeted rubber products. These products are used in various industries, including chemical and petrochemical processing, petroleum extraction and refining, pulp and paper processing, heavy-duty trucking, power generation, food and pharmaceutical processing, primary metal manufacturing, mining, water and waste treatment,

aerospace, medical, filtration, and semiconductor fabrication.

Products

The Sealing Products segment includes the product lines, which are designed, manufactured, and sold by its Garlock Sealing Technologies, Stemco, and Plastomer Technologies operations.

Gasket products are used for sealing flange joints in chemical, petrochemical and pulp and paper processing facilities where high pressures, high temperatures and corrosive chemicals create the need for specialized and highly engineered sealing products. The company sells these gasket products under the Garlock, Gylon, Blue-Gard, Stress-Saver, Edge, Graphonic, and Flexseal brand names.

Rotary seals are used in rotating applications to contain the lubricants that protect the bearings from excessive friction and heat generation. These rotary seals are used in applications in the steel industry, mining and pulp, and paper processing under various brand names, including Klozure and Model 64.

Compression packing is used to provide sealing in pressurized, static, and dynamic applications, such as pumps and valves. Major markets for compression packing products are the pulp and paper, mining, petrochemical, and hydrocarbon processing industries. Branded products for these markets include EVSP, Synthepak, and Graphlock.

Resilient metal seals provide tight sealing performance for demanding applications, such as nuclear power generation, semiconductor fabrication facilities, specific chemical processing applications, and race car engines. Branded products for these markets include Helicoflex, Ultraflex, and Feltmetal.

Critical service flange gaskets, seals, and electrical flange isolation kits are used in high-pressure wellhead equipment, flow lines, water injection lines, sour hydrocarbon process applications, and crude oil and natural gas pipeline/transmission line applications. These products are sold under the brand names Pikotek, VCS, Flowlok, and PGE.

The company's rubber products business manufactures rubber bearing pads, conveyor belts and other rubber products for industrial applications under the DuraKing, FlexKing, Vibon, Techflex, and HeatKing brand names.

Stemco manufactures various wheel-end, steering, suspension, and braking components used by the heavy-duty trucking industry to improve the performance and longevity of commercial tractors and trailers. Products for this market include hub oil seals, axle fasteners, hub caps, wheel bearings, mileage counters, king pin kits, suspension kits, brake friction, foundation brake parts, and automatic brake adjusters. The company sells these sealing products under the Stemco, Stemco Kaiser, Grit Guard, Guardian, Guardian HP, Voyager, Discover, Endeavor, Pro-Torq, Sentinel, DataTrac, Qwikkit, Pluskit, Econokit, Stemco Duroline, and Stemco Crewson brand names. The company also sells products under its RFID sensor-based BAT RF product line.

Plastomer Technologies manufactures PTFE specialty tape, formed PTFE products, and PTFE sheets and shapes. These PTFE products provide specialized and engineered solutions to its customers in the aircraft, fluid handling, and semicondu

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
