## Abstracts

Enviro Voraxial Technology Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Enviro Voraxial Technology Inc. and its competitors. This provides our Clients with a clear understanding of Enviro Voraxial Technology Inc. position in the [Heavy Machinery Industry](#).

The report contains detailed information about Enviro Voraxial Technology Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Enviro Voraxial Technology Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Enviro Voraxial Technology Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Enviro Voraxial Technology Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Enviro Voraxial Technology Inc. business.

### **About Enviro Voraxial Technology Inc.**

Enviro Voraxial Technology, Inc. provides environmental and industrial separation technology. The company engages in the manufacture of Voraxial Separator (Voraxial Separator or Voraxial), a technology that separates liquid/liquid, liquid/solids, or liquid/liquid/solids fluid mixtures with distinct specific gravities.

#### **Voraxial Separator**

The Voraxial Separator is a continuous flow turbo machine that generates a centrifugal force, a vortex, capable of separating light and heavy liquids, such as oil and water, or any other combination of liquids and solids at high flow rates. As the fluid passes through the machine, the Voraxial Separator accomplishes this separation through the creation of a vortex. In liquid/liquid and liquid/solid mixtures, this vortex causes the heavier compounds to gravitate to the outside of the flow and the lighter elements to move to the center where an inner core is formed.

The Voraxial Separator is a self-contained, non-clogging device that would be powered by an electric motor, diesel engine, or by hydraulic power generation. The Voraxial Separator would transfer various liquids in either direction by reversing the machine's

rotation.

The Voraxial Separator operates in-line and is scaleable. It is capable of processing volumes as low as 3 gallons per minute, as well as volumes approximately 10,000 gallons per minute with only one moving part. The company markets its product to oil-water separation, oil exploration and production, oil refineries, marine/oil-spill clean up, stormwater, manufacturing waste treatment, and grit/sand separation markets.

The company has installed Voraxial Separators, including units to Transocean, ConocoPhillips, Repsol, OMV, the Alaska Department of Environmental Conservation, the U.S. Navy, and Cameco, a uranium producing company for oil/water separation at a flow rate of approximately 400 gallons per minute.

The company installed Voraxial Deckwater Drainage System onto Transocean semi submersible rig Sedco 702, the offshore drilling contractor. The Sedco 702 is utilizing this system to protect the environment by separating oil from drainage water prior to discharge that meets local environmental requirements. The Voraxial Skid is being utilized to handle contaminated drill floor run-off water containing solids and drilling fluids. The Voraxial-powered system provides for separation while providing features that are critical to offshore platform operation: a small footprint, low energy requirement, and a no-pressure drop.

The company installed a Voraxial Skid on a drilling rig in the North Sea, for a drilling operation using lightweight drilling fluids. The Voraxial Skid, which is comprised of a Voraxial 4000 and a Voraxial 2000, operates in series to provide liquid/solid separation. The Voraxial Skid, which was leased to the customer for a specific project, was chosen for its solids separation efficiency, and for its ability to conduct good separation without the need of a pressure drop.

The system would be utilized in multiple applications in the oil industry, including produced water, under-balanced drilling (UBD), deck water drainage, slopwater, FPSO, and refinery markets. The Voraxial's small footprint, low energy requirements, and separation quality coupled with TwinFilters filtration equipment for secondary treatment provides the customer with a turnkey package that meets the discharge levels, such as OSPAR (North Sea countries

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
