## Abstracts

Environmental Solutions Worldwide Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Environmental Solutions Worldwide Inc. and its competitors. This provides our Clients with a clear understanding of Environmental Solutions Worldwide Inc. position in the [Auto Parts](#) Industry.

The report contains detailed information about Environmental Solutions Worldwide Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Environmental Solutions Worldwide Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Environmental Solutions Worldwide Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main

financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Environmental Solutions Worldwide Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Environmental Solutions Worldwide Inc. business.

### **About Environmental Solutions Worldwide Inc.**

Environmental Solutions Worldwide, Inc., through its wholly owned subsidiaries, engages in the design, development, manufacture, and sale of environmental technologies and emission testing services. The company focuses on the international medium duty and heavy duty diesel engine market for on-road and off-road vehicles, as well as the utility engine, mining, marine, locomotive, and military industries. It also offers engine and after treatment emissions verification testing and certification services.

#### **Principal Products**

The company develops diesel emissions technology solutions, advancing emissions reduction technology by commercializing proprietary catalytic emission conversion, control and support products and technologies. Its primary technologies and products are Therma Cat, Xtrm Cat, and Clean Cat diesel emissions control technologies. It also manufactures a line of military technologies, including the Stlth Cat and Scat-IR-Shield exhaust shielding technology employed on the U.S. Marine Light Armored Vehicles in

Iraq.

XTRM CAT is a proprietary diesel oxidation catalyst designed for electro motive diesel (EMD) turbocharged and roots blown engines and is based on its combat proven Stealth Cat filter system employed on the U.S. Marine Light Armored Vehicles. In 2009, it was selected for two emerging technology grants for deploying 17 Xtrm Cat marine variant units on 7 vessels operating on the Mississippi River and Puget Sound. It has also installed Xtrm Cat rail variants on various locomotives. These kits provide reductions of PM, hydro carbons (HC), and carbon monoxide (CO).

THERMA CAT Active Diesel Particulate Filter is an advanced level III? technology that is designed to provide the end user the flexibility and pre-retrofit usability that existed prior to installing a retrofit device. The Therma Cat was designed to meet various issues with the introduction of an exothermic based (flameless technology) that utilizes the vehicles existing fuel supply to supplement and raise the exhaust heat so that the Diesel Particulate Filter can regenerate and continue normal operations. The system operates in the background, transparent to the vehicle operator and does not impact the vehicles normal operations.

CLEAN CAT HP Diesel Oxidation Catalyst (DOC) achieves moderate reductions in PM emissions, while simultaneously reducing CO and HC. The DOCs are designed to be installed in-line into the existing exhaust systems between the muffler and the turbocharger. The DOC has engine coverage on four-stroke diesel engines for on-road and off-road applications with engine horsepower range between 150-600 hp. The Clean Cat Hp is designed for low sulfur diesel and ultra low sulfur diesel fuel for developing nations and markets in South America and Asia.

CLEAN CAT XP is a partial flow through filter achieves reductions in particulate matter emissions, while simultaneously reducing CO and HC. The DOCs are designed to be installed as a muffler replacement after the turbocharger. The DOC has engine coverage on four-stroke diesel engines for on-road applications with engine horsepower ranges of 150-600 hp and meet EPA Level II emissions requirements.

PERMISSIBLE CAT is a product that helps the mining community to meet the new emission targets regulated by the Mine Safety and Health Administration (MSHA) and is being used by Bucyrus Inc as part of an engine pack to meet the new MSHA underground coal mining requirements. It is also designed to reduce HC, CO, and unpleasant odors while not having an outer skin temperature approximately 300(degree) F.

M CAT is a market specific catalyst, developed for use in the mining industry. It is also designed to reduce hydrocarbons, carbon monoxide and unpleasant odors.

TERRA CAT is a combination of high temperature fiberglass filter and M Cat diesel oxidation catalyst (DOC). It is a MSHA approved technology designed for all size off-road combustion and compression engines. It is also designed to reduce HC, CO, and unpleasant odors.

TEMPMAX is an engine exhaust tube designed to be installed as a direct replacement to the existing OEM factory unit. TempMax delivers the engines ex

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
