The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes EPIQ Systems, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of EPIQ Systems, Inc. business.

About EPIQ Systems, Inc.

Epiq Systems, Inc. provides integrated technology solutions for the legal profession. The company's solutions streamline the administration of bankruptcy, litigation, financial transactions, and regulatory compliance matters.

The company offers technology solutions for electronic discovery, document review, legal notification, claims administration and controlled disbursement of funds. Its clients include law firms, corporate legal departments, bankruptcy trustees, and professional advisors.

Segments

Electronic Discovery Segment

Electronic Discovery segment provides collections and forensics, processing, search and review, and document review services to companies and the litigation departments of law firms. The company's eDataMatrix software analyzes, filters, deduplicates, and produces documents for review. Produced documents are made available primarily through a hosted environment, and its DocuMatrix software allows for attorney review and data requests. The company's customers are typically corporations that use its

products and services cooperatively with their legal counsel to manage the electronic discovery process for litigation and regulatory matters.

The company's electronic discovery business include consulting, forensics and collection service fees based on the number of hours a professional services team spends providing the requested services; fees related to the conversion of data into an organized, searchable electronic database; hosting fees based on the amount of data stored; and document review fees based on the number of hours spent reviewing documents, the number of pages reviewed, or the amount of data reviewed.

In 2009, the company also launched IQ Review, a combination of new intelligent technology and services, which incorporates new prioritization technology into DocuMatrix, its primary document management platform.

Bankruptcy Segment

Bankruptcy is an integral part of the United States' economy. The Bankruptcy Segment provides solutions that address the needs of Chapter 7, Chapter 11 and Chapter 13 bankruptcy trustees to administer bankruptcy proceedings and of debtor corporations that file a plan of reorganization.

The end-user customers of its bankruptcy business are debtor corporations that file a plan of reorganization and professional bankruptcy trustees. The bankruptcy trustee's primary responsibilities include liquidating the debtor's assets or collecting funds from the debtor, distributing the collected funds to creditors pursuant to the orders of the bankruptcy court, and preparing regular status reports for the Executive Office for United States Trustees and for the bankruptcy court. Trustees manage an entire caseload of bankruptcy cases simultaneously.

Settlement Administration Segment

The Settlement Administration Segment provides managed services, including legal notification, claims administration, project administration and controlled disbursement. The customers of its settlement administration segment are corporations that are administering the settlement or resolution of class action cases or administering projects. The company sells its services directly to those customers and other interested parties, including legal counsel, which often provide access to these customers.

Competition

Electronic Discovery: Competitors include Electronic Evidence Discovery, Inc., Fios, Inc., Kroll Ontrack (Marsh & McLennan Companies), Attenex (FTI Consulting, Inc.), Autonomy ZANTAZ, Inc., Stratify, Inc. (Iron Mountain Incorporated), and Clearwell Systems, Inc.

Bankruptcy: The company's primary competitors are Bankruptcy Management Solutions, Inc., Kurtzman Carson Consultants LLC, and The Garden City Group, Inc.

Settlement Administration: The company's competitors include The Garden City Group, Inc., Rust Consulting, Inc., and Gilardi & Co. LLC.

History

Epiq Systems, Inc. was founded in 1988.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
