The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Epolin Inc. business.

## **About Epolin Inc.**

Epolin, Inc., a specialized chemical company, engages in the manufacture, marketing, research, and development of dyes and dye formulations.

### Products

#### INFRARED DYES

The company develops, manufactures, and sells near infrared dyes. Applications for its dyes cover various markets that include laser protection, welding, sunglasses, optical filters, glazing and imaging, and security inks and tagants. The company's Epolight NIR dyes absorb in the near infrared region of the electromagnetic light spectrum which is 700nm to 1600nm. Epolight dyes are sold as pure crystalline dyes or formulated mixtures. The company also incorporates its dyes into liquid inks and thermoplastics pellets. It has approximately 275 to 300 product formulations.

The company's products are divided into five product groups, including dyes, dye blends, inks and coatings, laminate pellets and others. It sells its products into three primary market segments.

### Eye Protection

The company's eye protection products are used in plastic lenses, eyeglasses, goggles, windows, and shields that protect eyes from high energy ultraviolet (UV), visible, and near infrared radiation. Typical end-users include welders, military, industrial, and medical laser users. The company's dyes protect the eyes by absorbing the harmful wavelengths of light while simultaneously allowing visible light transmission.

### Security Ink

The company's inks and coatings are used on credit cards, as well as security inks for documents and packaging. Typical end-users include banks, printers, publishers, and consumer goods companies. Its products make transparent ATM cards readable by ATM machines. Its near infra-red (NIR) dyes are almost invisible and mask important data or otherwise tag products by code as genuine. Its products are viable tools to thwart counterfeiting and fraud.

### Light Management

The company's light management products are used in laser equipment, electronic displays, night vision systems, solar heat shields, heat and light sensors, imaging systems, plasma televisions, and data storage discs. Typical end-users include various industrial, automotive, aerospace, construction, and electronic users. The light management market includes market niches. Its light management dyes allow for the filtering and manipulation of visible light and NIR light for various applications.

## SPECIALTY CHEMICAL PRODUCTS

The company also maintains a level of production and sales of specialty products made on a custom basis. These include additives for plastics, thermochromic materials for use in paints, as well as other specialty chemicals made in low volume.

### Markets

The company sells its products to manufacturers of plastics/resins, credit cards, electronics, glass, and other basic materials primarily in the United States, Asia, and Europe.

### History

Epolin, Inc. was founded in 1983.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
