Abstracts

EQT Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between EQT Corporation and its competitors. This provides our Clients with a clear understanding of EQT Corporation position in the [Energy](#) Industry.

The report contains detailed information about EQT Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for EQT Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The EQT Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes EQT Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of EQT Corporation business.

About EQT Corporation

EQT Corporation offers energy products, such as natural gas, natural gas liquids (NGLs), and crude oil; and services to wholesale and retail customers in the United States.

Segments

The company operates through three segments: EQT Production, EQT Midstream, and Distribution.

EQT Production

EQT Production produces natural gas in the Appalachian Basin. This segment has approximately 3.4 million gross acres. EQT Production has 4.1 Tcfe of proved reserves across three major plays: Huron/Berea, Marcellus, and CBM, all located in the Appalachian Basin. The company has focused its horizontal air drilling program in the Huron/Berea play where the company has approximately 2.7 million acres and 2.8 Tcfe of proved reserves. It is also employing horizontal drilling technology to its 450,000 acres and 1.1 Tcfe of proved reserves in the Marcellus play. EQT Production's produced natural gas is sold to marketers (including EQT Energy), utilities, and industrial

customers located mainly in the Appalachian area.

Midstream

EQT Midstream provides gathering, processing, transmission, and storage services to EQT Production and to independent third parties in the Appalachian Basin. The company has approximately 10,650 miles of gathering lines and 970 miles of transmission lines. EQT also owns and operates Kentucky Hydrocarbon, a gas processing facility in Langley, Kentucky. Through Equitrans L.P. (Equitrans, EQT's interstate pipeline affiliate), EQT's transmission and storage system interconnects with five major interstate pipelines: Texas Eastern Transmission, Columbia Gas Transmission, National Fuel Gas Supply, Tennessee Gas Pipeline, and Dominion Transmission. EQT Midstream's 14 natural gas storage reservoirs provide approximately 500 MMcf per day of peak delivery capability and 63 Bcf of storage capacity, of which 32 Bcf is working gas. EQT's storage reservoirs are clustered in two geographic areas, with eight in northern West Virginia and six in southwestern Pennsylvania. As of December 31, 2009, EQT Midstream, through Equitrans and EQT Energy, LLC (EQT Energy, EQT's gas marketing affiliate), leased an additional 8.2 Bcf of contractual storage capacity and 118,834 Dth per day of contractual pipeline capacity from third parties. In addition, in 2008, EQT Energy executed a binding precedent agreement with Tennessee Gas Pipeline Company (TGP), a wholly owned subsidiary of El Paso Corporation, for a 15-year term that awarded the company capacity in TGP's 300-Line expansion project.

Distribution

The company's regulated natural gas distribution subsidiary, Equitable Gas Company, LLC (Equitable Gas, EQT's local distribution affiliate), distributes and sells natural gas to residential, commercial, and industrial customers in southwestern Pennsylvania, West Virginia, and eastern Kentucky. Equitable Gas also operates a gathering system in Pennsylvania and provides off-system sales activities which include the purchase and delivery of gas to customers at mutually agreed-upon points on facilities not owned by the company.

This segment owns and operates natural gas distribution and gathering facilities, as well as other general property and equipment in western Pennsylvania, West Virginia and Kentucky. The distribution operations consist of approximately 4,000 miles of pipe in Pennsylvania, West Virginia, and Kentucky.

The company's distribution segment provides natural gas distribution services to approximately 275,900 customers, consisting of 257,300 residential customers and 18,600 commercial and industrial customers in southwestern Pennsylvania, municipalities in northern West Virginia and field line sales in eastern Kentucky and West Virginia.

History

The company was founded in 1925. It was formerly known as Equitable Resources, Inc. and changed its name to EQT Corporation in 2009.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
