The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Erie Indemnity Co. business.

About Erie Indemnity Co.

Erie Indemnity Company is a managing Attorney-in-Fact for the subscribers at Erie Insurance Exchange (Exchange). The Exchange is a subscriber (policyholder) owned Pennsylvania-domiciled reciprocal insurer that writes property/casualty insurance.

The company's primary function is to perform certain services for the Exchange relating to sales, underwriting and issuance of policies on behalf of the Exchange. This is done in accordance with a subscribers agreement (a limited power of attorney) executed by each subscriber (policyholder), appointing the company their common attorney-in-fact to transact business on their behalf and to manage their affairs at the Exchange.

The Exchange and its wholly-owned subsidiary, Flagship City Insurance Company (Flagship) and the Indemnity's wholly-owned subsidiaries, Erie Insurance Company (EIC), Erie Insurance Company of New York (ENY) and the Erie Insurance Property and Casualty Company (EPC), comprise the Property and Casualty Group.

The Property and Casualty Group is a regional insurance group operating in 11 Midwestern, Mid-Atlantic, and southeastern states and the District of Columbia. The Property and Casualty Group primarily writes personal auto insurance.

Segments

The company operates its business as three segments: Management operations, Insurance underwriting operations, and Investment operations.

Management operations: The company has an interest in the growth and financial condition of the Exchange as the Exchange is sole customer.

Insurance underwriting operations: The members of the Property and Casualty Group pool their underwriting results. Under the reinsurance pooling arrangement, the Exchange assumes 94.5% of the pool. Accordingly, the underwriting risk of the Property and Casualty Group's business is borne by the Exchange. The principal personal lines products based on 2009 direct written premiums were private passenger automobile and homeowners. The principal commercial lines products based on 2009 direct written premiums were commercial multi-peril, commercial automobile, and workers compensation.

The Property and Casualty Group writes business in Illinois, Indiana, Maryland, New York, North Carolina, Ohio, Pennsylvania, Tennessee, Virginia, West Virginia, Wisconsin and the District of Columbia. The Property and Casualty Group is represented by approximately 2,000 independent agencies.

Investment operations: The company has fixed maturity, equity security and alternative investment portfolios. The portfolios are managed with a view toward maximizing after-tax yields and limiting credit risk.

History

Erie Indemnity Company was founded in 1925.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
