## Abstracts

ESCO Technologies Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between ESCO Technologies Inc. and its competitors. This provides our Clients with a clear understanding of ESCO Technologies Inc. position in the [Heavy Machinery](#) Industry.

The report contains detailed information about ESCO Technologies Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for ESCO Technologies Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The ESCO Technologies Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes ESCO Technologies Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of ESCO Technologies Inc. business.

## **About ESCO Technologies Inc.**

ESCO Technologies Inc. produces engineered products and systems sold to customers worldwide primarily for utility, industrial, aerospace, and commercial applications.

### Segments

The company operates in three segments, such as Utility Solutions Group (Utility Solutions); RF Shielding and Test (Test); and Filtration/Fluid Flow (Filtration).

#### Utility Solutions Segment

The Utility Solutions Segment includes subsidiaries, such as Aclara Power-Line Systems Inc. (Aclara PLS); Aclara RF Systems Inc. (Aclara RF); Aclara Software Inc.; Doble Engineering Company; Doble Lemke AG; Doble Lemke GmbH; Doble PowerTest Limited; and Doble TransiNor AS.

Aclara RF provides, through its STAR network, wireless radio frequency (RF) data communications systems to gas, water and electric utilities for advanced metering infrastructure (AMI) applications. The STAR network provides billing, high/low consumption reporting, and non-revenue water loss detection. Aclara RF has entered

into a contract with Pacific Gas & Electric (PG&E) to provide its communications system for the gas meter portion of PG&E's AMI Project, and also gave PG&E the option to purchase Aclara RF's fixed network systems for the electric portion of the Project.

Aclara PLS manufactures two-way power line communication systems for the electric utility industry (the TWACS systems), which are composed of equipment (primarily meter modules and equipment for central stations and substations), software and support services. The TWACS systems provide electric utilities with a proprietary communication technology for automatic meter reading, load control, interval data, outage assessment/restoration monitoring, remote service disconnect/connect, time-of-use data for critical peak pricing, tamper/theft detection, and pre-paid metering.

Aclara Software Inc. provides utilities with software systems for energy and water information, delivering a meter data management system (MDMS), AMI/meter device records and asset management, proven business applications addressing areas, such as revenue assurance and distribution asset analysis, and customer presentment and analysis applications. Aclara's analytics-based software applications are used by approximately 100 major energy organizations worldwide.

### RF Shielding and Test Segment

The RF Shielding and Test Segment include subsidiaries, such as Beijing Lindgren ElectronMagnetic Technology Co., Ltd.; ETS Lindgren Engineering India Private Limited; ETS Lindgren Japan, Inc.; ETS Lindgren Limited; ETS-Lindgren L.P.; ETS-Lindgren OY; and Lindgren R.F. Enclosures, Inc.

ETS-Lindgren designs and manufactures products to measure and contain magnetic, electromagnetic and acoustic energy. It supplies customers with a range of isolated environments, including RF test enclosures, acoustic test enclosures, RF and magnetically shielded rooms, secure communication facilities, and broadcast and recording studios. These facilities include proprietary features, such as shielded doors and windows. ETS-Lindgren also provides the design, program management, installation, and integration services required to complete these types of facilities.

ETS-Lindgren also supplies customers with a range of components, including RF absorptive materials, RF filters, active compensation systems, antennas, antenna masts, turntables and electric and magnetic probes, RF test cells, proprietary measurement software, and other test accessories required to perform various tests. ETS-Lindgren also offers various services, including calibration for antennas and field

probes, chamber certification, field surveys, customer training and various product tests. ETS-Lindgren operates various accredited test labs, such as American Association for Laboratory Accreditation (A2LA), National Voluntary Laboratory Accreditation Program (NAVLAP), and CATL (CTIA-The Wireless Association (CTIA) Accredited Test Lab). ETS-Lindgren serves the acoustics, medical, health and safety, electronics, wireless communications, automotive, and defense markets.

### Filtration/Fluid Flow Segment

The Filtration/Fluid Flow Segment includes subsidiaries, such as Crissair, Inc.; PTI Technologies In

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
