The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Essex Property Trust Inc. business.

About Essex Property Trust Inc.

Essex Property Trust, Inc. operates as a self-administered and self-managed real estate investment trust (REIT). The company owns all of its interest in its real properties directly or indirectly through Essex Portfolio, L.P. (the 'Operating Partnership').

The company is engaged primarily in the ownership, operation, management, acquisition, development and redevelopment of real estate. The majority of its real estate consists of apartment communities. As of December 31, 2007, the company owned or held an interest in 134 apartment communities, aggregating 27,489 units, located predominantly along the West Coast (collectively, the 'Properties').

The company's other properties included six office buildings (totaling approximately 478,040 square feet) two recreational vehicle parks (totaling 338 spaces), and one manufactured housing community (containing 157 sites). The company has six development projects with 1,079 units in various stages of active development.

Development Pipeline

The company defines development activities as new properties that are being constructed, or are newly constructed and, in the case of development communities, are

in a phase of lease-up and have not yet reached stabilized operations. As of December 31, 2007, excluding development projects owned by Essex Apartment Value Fund II, L.P. (Fund II), the Company had three development projects comprised of 684 units. As of December 31, 2007, the Company had five development communities aggregating 1,658 units that were classified as predevelopment projects. The company owned five land parcels held for future development aggregating 434 units as of December 31, 2007.

Redevelopment Pipeline

The company defines redevelopment communities as existing properties owned or recently acquired, which have been targeted for additional investment by the company with the expectation of increased financial returns through property improvement. As of December 31, 2007, the company had ownership interests in thirteen major redevelopment communities aggregating 3,891 apartment units. The company has acquired DuPont Lofts, a 115-unit condominium development project in Irvine, California.

REIT Tax Status

The company has elected to be taxed as a REIT and would not be subject to federal income tax on the portion of its income that is distributed to stockholders.

History

Essex Property Trust, Inc. was founded in 1971.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
