## Abstracts

Essilor International Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Essilor International and its competitors. This provides our Clients with a clear understanding of Essilor International position in the [Healthcare Equipment and Supplies](#) Industry.

The report contains detailed information about Essilor International that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Essilor International. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Essilor International financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Essilor International competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Essilor International business.

## **About Essilor International**

Essilor International engages in the design and manufacture of lenses for all types of visual disorders, including myopia, hypermetropia, presbyopia, and stigmatism. The company also engages in the manufacture and sale of optical instruments, which are mainly machines used to edge finished lenses and diagnose visual disorders.

The company supplies and markets finished and semi-finished lense products worldwide. Its finished lenses are both side single-vision lenses and are mass-produced in Essilor Group plants. Additional coatings are also applied in the plants that include scratch-proof coatings, anti-reflective coatings, anti-smudge coatings, and photochromic properties.

The company offers a range of lenses under the Varilux, Crizal, Essilor and Definity brands to correct myopia, hyperopia, presbyopia and astigmatism.

### **New Products**

#### **Progressive Lenses**

The Varilux Physio F-360°: The Varilux Physio (a lens designed using wavefront

management technology and produced through digital surfacing) was significantly enhanced during the year 2007. The new addition to the lineup, the Varilux Physio f-360° is a dual-side progressive lens. The front side incorporates the degree of correction for presbyopia, while the back side integrates the required degree of correction for any visual defect (astigmatism, hyperopia or myopia) and takes five fitting parameters into account: the distance between the eyes, the fitting height at the pupil center, the lens-eye distance, the lens inclination, and the angle of curvature of the frame.

**Varilux Sport:** Following the specialized Varilux Computer and Varilux Road Pilot lenses, the company introduced Varilux Sport, a progressive lens purpose-designed for such sports as mountain biking, sailing, skiing and golf. Its design, which integrates digital surfacing technology, delivers vision and an enlarged visual field. Made of polycarbonate material for its resistance, lightness and UV protection, it is also available as a sun lens.

## Sun Lenses

The company, in 2007, introduced two new corrective sun lens ranges: the first, Sports solutions, which are designed for users who practice outdoor sports that require specific solar filters, such as skiing, fishing, golf, mountain climbing and sailing. The second, Airwear Melanine, is tinted using melanin pigment to protect the eyes and skin from ultra-violet rays. It also filters blue light, thus improving contrast and visual acuity. These two products were introduced in Europe in 2007 and in North America, Australia and New Zealand in February 2008.

The company, in January 2007, introduced Crizal Sun in the United States and Canada. It is a coating created for sun lenses that combines anti-reflective protection on the back side of the lenses with Crizal Alizé's scratch-resistance and cleaning properties on both sides.

## History

Essilor International was founded in 1849.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to

the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
