Abstracts

Esterline Technologies Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Esterline Technologies Corp. and its competitors. This provides our Clients with a clear understanding of Esterline Technologies Corp. position in the [Aerospace and Defense Industry](#).

The report contains detailed information about Esterline Technologies Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Esterline Technologies Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Esterline Technologies Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Esterline Technologies Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Esterline Technologies Corp. business.

About Esterline Technologies Corp.

Esterline Technologies Corporation, a specialized manufacturing company, designs, manufactures, and markets engineered products and systems for applications with in the aerospace and defense industries.

Segments

The company's business focuses on the development of products in three technology segments – Avionics & Controls, Sensors & Systems, and Advanced Materials, including thermally engineered components and specialized elastomers and other complex materials, principally for aerospace and defense markets.

Avionics & Controls segment

Avionics & Controls segment includes avionics systems, control systems, interface technologies, and communication systems capabilities. Avionics systems designs and develops cockpit systems integration and avionics solutions for commercial and military applications. Control systems designs and manufactures technology interface systems for military and commercial aircraft and land- and sea-based military vehicles. Interface

technologies manufactures and develops custom control panels and input systems for medical, industrial, military, and casino gaming industries.

Communication systems designs and manufactures military audio and data products for battlefield environments. In addition, communication systems designs and manufactures voice and data switching systems for military airborne, ground-based, and shipboard applications.

The company provides global positioning systems (GPS), head-up displays, enhanced vision systems, and electronic flight management systems that are used in various control and display applications. In addition, it develops, manufactures, and markets sophisticated technology interface systems for commercial and military aircraft. These products include lighted push-button and rotary switches, keyboards, lighted indicators, panels, and displays.

The company manufactures control sticks, grips and wheels, as well as specialized switching systems. In this area, the company primarily serves commercial and military aviation, and airborne and ground-based military equipment manufacturing customers. It manufactures pilot control grips for major types of military fighter jets and helicopters. Its products are incorporated in various platforms ranging from military helicopters, fighters and transports, to commercial wide- and narrow-body, regional, and business jets. In 2010, the company's major customers for these products included BAE Systems, The Boeing Company, Canadian Commercial Corp., Hawker Beechcraft, Honeywell, Hamilton Sunstrand, Lockheed Martin, Rockwell Collins, and Sikorsky.

The company also supplies custom input integration with a line of keyboard, switch and input technologies for specialized medical equipment, communications systems, and comparable equipment for military applications. These products include custom keyboards, keypads, and input devices that integrate cursor control devices, bar-code scanners, displays, video, and voice activation. It also produces instruments that are used for point-of-use and point-of-care in vivo diagnostics. In 2010, its major customers for these products included Alere, Dictaphone, DRS Tactical Systems, General Electric, IDEXX Laboratories, Jabil Circuit, Philips, Roche, Siemens, and WMS.

In addition, the company designs and manufacture ruggedized military personal communication equipment, primarily headsets. It supplies Active Noise Reduction (ANR) headsets to the British Army's tracked and wheeled vehicle fleets under the Bowman communication system program. In the U.S., it supplies ANR headsets to the U.S. Army's tracked and wheeled vehicle fleets under the Vehicle Intercom System

(VIS) and VIS-X programs consisting of approximately 200,000 vehicles, and the company is the supplier to the U.S. Marine Corps for their M-ATV fleet. The company is the ANR headset supplier to the Canadian Army. The company has a relationship with armies around the world, including forces in India, Australia, Spain, and Saudi Arabia. In 2010, the company's major customers for these products included Northrop Grumman, Lockheed Martin, Simex Defense, Sanmina-SCI, and the British Ministry of Defence (MoD).

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
