The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Etelos, Inc. business.

About Etelos, Inc.

Etelos, Inc. provides tools and services for the development and distribution of Web applications. The company also provides a software-as-a-service (SaaS) ecosystem for building, distributing, and using Web applications, including a marketplace to deploy and support them.

The company enables software manufacturers to migrate existing applications or create new applications, as well as involves in the package, distribution, hosting, billing, marketing, and supporting SaaS enabled applications through private label applications marketplaces.

Etelos Products and Services

Etelos has developed and offers a range of products and services for developers and for consumers of Web Applications. Its product offerings are grouped into two basic programs, including the Etelos Ecosystem and the Etelos Platform Suite.

The Etelos Ecosystem: The company provides a development, distribution, and consumption environment for scaling applications and providing business solutions to common business problems.

Etelos development products for Web Applications include open standards-based tools for Web developers, business and individual users such as the Etelos Application Server (EAS) and the Etelos Development Environment (EDE). EAS and EDE support common application languages and also support the English Application Scripting Engine (EASE).

Web Applications built with or brought to the Etelos ecosystem are made available for distribution in the Etelos Marketplace as a subscription service using the Software-as-a-Service (SaaS) or software-on-demand business model. The Etelos Marketplace gives developers of Web Applications, including Etelos, a place to distribute and support Web Applications. Web Applications delivered through the Etelos Marketplace would be billed, distributed and configured to provide updates and support to users in accordance with the developer's desires. The company also provides additional paid professional services and support on behalf of Syndication and Marketplace Partners.

The Etelos Marketplace enables rapid adoption of Web Applications by giving customers freedom of choice to select from an array of fully customizable, on-demand business applications. Its applications might be deployed in the hosting environment of the customer's choice, including hosting services provided through it. Web Applications built on the company's platform might be integrated with other Web Applications through the use of Etelos App Sync, hosted anywhere, and customized to create business solutions.

Etelos Platform Suite: The Etelos Platform Suite allows third parties to use its software platforms and its services to develop a private label application and marketplace. There are four components to the Etelos Platform Suite: The SaaS Application Platform enables technology providers to move their non-Web Application or service to Web-based SaaS distribution; The SaaS Marketplace Platform enables third parties to offer various syndicated Web Applications and services in a third party-branded SaaS marketplace; The SaaS Distribution Platform allows technology companies and service providers to distribute additional Web Applications and services to customers on a SaaS platform; and The SaaS Syndication Platform lets SaaS providers distribute their Web Applications and services through a network of third party-branded marketplaces.

Etelos Web Application Hosting: By using almost any programming language a developer chooses, including own EASE language, and by hosting Web Applications wherever users want, utilizing Etelos Application Server, the Etelos Development Environment allows partners to extend solutions using its platform.

Professional Services: The company is developing repeatable, consulting, and implementation services to assist its customers with integrating Web Applications, using them on and off-line and importing data from other systems. It provides support services.

Sales and Marketing

The company's direct sales team consists of professionals in various locations in the United States, with additional development, distribution, and business relationships being developed in North America, South America, Europe, and the Asia-Pacific region. It focuses on small-to-medium sized businesses.

Competition

The company's competitors include NetSuite, Inc.; Epicor Software Corporation; Jamcracker; Intuit Inc.; Microsoft Corporation; SAP; The Sage Group plc; Amazon; and salesforce.com, inc.

History

Etelos, Inc. was founded in 1999.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
