The Eternal Energy Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Eternal Energy Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Eternal Energy Corp. business.

About Eternal Energy Corp.

Eternal Energy Corp. engages in the exploration for petroleum and natural gas in the State of Nevada, the North Sea, and the Pebble Beach Project.

Properties

The company has contractual rights and interests in a joint venture with Eden Energy Corp. for the acquisition of oil and gas leases and drilling wells to explore for oil and natural gas reserves on the Big Sand Spring Valley Prospect located in Nye County, Nevada (the BSSV Project). As a result, it has rights to acquire a 50% working interest in approximately 82,184 gross acres. The company has entered into a letter agreement with Eden Energy, with respect to its right to participate with Eden Energy in the exploration of oil and natural gas reserves located on approximately 77,000 gross and net acres of land in central eastern Nevada (the Cherry Creek Project). It has entered into an agreement with Eden Energy relative to the BSSV Project and Cherry Creek Project. The agreement provides for a release of its option in the Cherry Creek Project in exchange for an assignment of a 100% interest in the BSSV Project. The BSSV Project consists of approximately 102,000 Federal gross and net acres in Nevada.

The company has acquired rights to participate in the drilling of an exploratory well in a

North Sea petroleum exploration project (the Quad 14 Project) with International Frontier Resources Corporation (IFR), an oil and gas exploration company based in Calgary, Alberta, Canada. The Quad 14 Project contemplates the drilling, testing, completing, and equipping an initial exploratory test well on a 255 square kilometer block located in Quad 14 in the North Sea. The 255-kilometer acreage block is located 24 kilometers south of the 639 million barrel Claymore oil field, 20 kilometers south of the 132 million barrel Scapa oil field, and 9 kilometers north of the 592 billion cubic foot Goldeneye natural gas field. The company has acquired a 10% working interest in its second petroleum exploration project in the North Sea through which the company entered into an agreement with IFR to participate in the drilling of an exploratory well in a 970 square kilometer acreage block located in Quad 41 and Quad 42 in the North Sea (the Quad 41/42 Project).

The company has acquired 15% of the capital stock of Pebble Petroleum, Inc. (Pebble), as well as the rights and interests in the Pebble Beach Project. The agreement with Pebble provides the company with a 5% overriding royalty interest in approximately 355,009 gross and net acres in western Canada. The Pebble agreement also provides the company with a 10% working interest in approximately 61,412 gross and 35,145 net acres in the northern United States.

The company owns a 75% working interest in the SW Extension of the West Ranch field in Jackson County, Texas. This property includes approximately 1,000 gross and net acres.

History

The company was incorporated in 2003. It was formerly known as Golden Hope Resources Corp. and changed its name to Eternal Energy Corp. in 2005.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
