The EV Energy Partners LP financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes EV Energy Partners LP competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of EV Energy Partners LP business.

About EV Energy Partners LP

EV Energy Partners, L.P. engages in the exploration, development and production of oil and natural gas properties.

As of December 31, 2006, the company's properties were located in the Appalachian Basin (primarily in Ohio and West Virginia), the Monroe Field in Northern Louisiana and the Mid-Continent areas in Oklahoma, Texas and Louisiana.

In January 2007, the company acquired natural gas properties in Michigan from an institutional partnership managed by EnerVest and, in March 2007, it acquired additional properties in the Monroe Field from an institutional partnership managed by EnerVest.

As of December 31, 2006, the company had estimated net proved reserves of 2.0 MMBbls of oil and 49.4 Bcf of natural gas.

Appalachian Basin

The company's activities are concentrated in the Ohio and West Virginia areas of the Appalachian Basin. It owns an average 92% working interest in 797 gross producing

wells. As of December 31, 2006, its estimated net proved reserves in the Appalachian Basin were 1,042.4 MBbls of oil and 26.2 Bcfe of natural gas, or 32.4 Bcfe.

Ohio Area: The company's Ohio area properties are located in 22 counties in Eastern Ohio and three counties in Western Pennsylvania. It owns an average 92% working interest in 652 gross producing wells. It produces both oil and natural gas in this area, predominately from the Clinton reservoir, a blanket sand found at depths ranging from 3,155 to 5,500 feet. Its estimated net proved reserves in the Ohio area as of December 31, 2006 were 956 MBbls of oil, or 5.7 Bcfe, and 18.5 Bcf of natural gas, or 24.3 Bcfe.

West Virginia Area: The company's West Virginia area properties are located in seven counties in North Central West Virginia and one county in Southwestern Pennsylvania. It owns an average 92% working interest in 145 gross producing wells. It produces natural gas from up to nine different zones at depths of between 2,500 and 5,500 feet. Its estimated net proved reserves in the West Virginia area as of December 31, 2006 were 86.4 MBbls of oil and 7.6 Bcf of natural gas, or 8.2 Bcfe.

Monroe Field

The company's Monroe Field properties are located in three parishes in Northeast Louisiana. In this field the company produces natural gas from the Monroe gas rock formation at approximately 2,200 feet. Its estimated net proved reserves as of December 31, 2006 in the Monroe Field, 100% of which is natural gas, was 14.3 Bcfe.

Mid-Continent Area

The company acquired its Mid-Continent area properties in December 2006. The properties are primarily located in six counties in Western Oklahoma, three counties in Texas and two parishes in North Louisiana. Its estimated net proved reserves as of December 31, 2006 were 14.8 Bcfe.

Well Operations

The company has entered into operating agreements with EnerVest. Under these operating agreements, EnerVest acts as contract operator of the oil and natural gas wells and related gathering systems and production facilities in which it owns an interest in gathering system or production facilities.

Natural Gas Gathering

The company owns and operates a network of natural gas gathering systems in both its palachian and Northern Louisiana areas of operation which gathers and transports its tural gas and a small amount of third party natural gas to larger gathering systems intrastate, interstate and local distribution pipelines.

The company signed an agreement to acquire oil and natural gas properties from Anadarko Petroleum Corporation. The acquisition is comprised of wells producing primarily from the Austin Chalk formation in ten counties in Central and East Texas.

Customers

The company's major customer is EnerVest Monroe Marketing, Ltd.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
