The Exobox Technologies Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Exobox Technologies Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Exobox Technologies Corp. business.

About Exobox Technologies Corp.

Exobox Technologies Corp. develops, markets, and sells security software solutions that help organizations protect and recover their most valuable information assets. The company's security solutions help clients mitigate risks associated with the unauthorized disclosure of data and information that compromises market reputation, strategic advantage, credit exposure, and governance compliance.

Products

ExoDetect: This is a Data Leak Detection (DLD) SaaS solution, which is the Web-based software solution available today that simultaneously delivers the ability to perform thorough scans for compromised data on any exposed area in the Internet Cloud; classify the discovered information according to confidence and severity ratings; and capture the forensic evidence needed to address the breach, including litigation or prosecution. It provides an approach to information security, by identifying data leaks, beyond corporate networks or computers – often referred to as 'the enterprise'.

ExoAudit: The company offers ExoAudit for Data Auditing.

ExoRecover: The company offers ExoRecover for Data Recovery and Retention.

ExoControl: The company offers ExoControl for Data Access and Change Control.

ExoProtect: The company offers ExoProtect for Data Leak Prevention.

Customers

The company's products mainly serves Internet service providers, banks and financial institutions, government agencies, software makers, computer hardware manufacturers, home PC users, business PC users, educational institutions, and e-commerce companies – and license the software for use by those institutions. Its major customers include IBM, Accenture, BearingPoint, HP/EDS, CSC Computer Sciences Corp., Perot Systems, Dell, HP, Apple, and Seagate.

Competition

The company's major competitors include: evidence collection or data loss service providers, such as Tiversa, Accenture, and Applied Discovery; content monitoring and filtering (CMF)/Data Loss Prevention (DLP) software providers, such as Websense, Symantec, and Vericept; information risk management software and service providers, such as RSA, Computer Associates, and Check Point Software; and anti-virus software providers, such as McAfee, TrendMicro, and Panda Security.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
