## Abstracts

F5 Networks, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between F5 Networks, Inc. and its competitors. This provides our Clients with a clear understanding of F5 Networks, Inc. position in the [Computers and Electronic Equipment](#) Industry.

The report contains detailed information about F5 Networks, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for F5 Networks, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The F5 Networks, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes F5 Networks, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of F5 Networks, Inc. business.

### **About F5 Networks, Inc.**

F5 Networks, Inc. provides technology that optimizes the delivery of network-based applications and the security, performance and availability of servers, data storage devices, and other network resources. The company provides products and services to help companies manage their Internet Protocol (IP) traffic and file storage infrastructure.

In addition, the company offers complementary products that provide secure remote access to corporate networks and optimize the delivery of applications over wide-area networks. It also offers a range of services that include consulting, training, maintenance, and other technical support services.

### **Products**

The company's core technology is hardware and software for application delivery networking, including application security, secure remote access, policy management, WAN optimization and file virtualization.

The company's principal products are systems that integrate its software with purpose-built hardware that incorporates commodity components. In addition, it offers a virtual (software only) version of BIG-IP called BIG-IP LTM (VE) that is designed to run on

servers and work in conjunction with its systems to provide granular management of virtual servers and applications.

### BIG-IP Application Delivery Controllers

The company's family of hardware platforms, designed to exploit the features, functionality and performance of TMOS Version 10, includes BIG-IP 1600, BIG-IP 3600, BIG-IP 3900, BIG-IP 6900, BIG-IP 8900, BIG-IP 8950, BIG-IP 11050 and VIPRION, its chassis-based application delivery controller. In addition to local area traffic management, BIG-IP supports various add-on software products and features. Software products available for BIG-IP platforms include GTM, Link Controller, ASM, WebAccelerator, WOM and APM. Software features available on TMOS include Advanced Client Authentication, Advanced Routing, Fast Cache, Intelligent Compression, IPv6 Gateway, L7 Rate Shaping, Message Security Module, Protocol Security Module, and SSL Acceleration.

### VIPRION

VIPRION is the company's chassis-based application delivery controller that scales from one to four blades, each equipped with two dual-core processors. It offers the PB 200 blade, equivalent in performance to a BIG-IP 8950 and double the performance of the previous blade.

### FirePass

FirePass appliances provide SSL VPN access for remote users of IP networks and any applications connected to those networks from any standard Web browser on any device. The components of FirePass include a policy engine, which manages user authentication and authorization privileges, and special components that enable corporations to give remote users controlled access to a range of applications and resources within the network. FirePass also supports Application Ready Access, providing full reverse-proxy services for application portals, including those of SAP, Oracle, Microsoft, and others.

The company sells three FirePass products: The FirePass 1200 appliance is designed for small to medium enterprises and branch offices and supports from 10 to 100 concurrent users. The FirePass 4100 controller is designed for medium size enterprises and, from a price/performance standpoint, is recommended for approximately 500 concurrent users. The FirePass 4300 appliance is designed for medium to large

enterprises and service providers and supports approximately 2,000 concurrent users. It offers FirePass Virtual Edition, which runs in a VMware ESXi 4.0 virtual environment and is designed for medium to large enterprises and service providers. It supports approximately 2,000 concurrent users and offers a virtual solution for secure, Web-based remote access to corporate applications and desktops.

#### Application Security Manager (ASM)

Application Security Manager is a Web application firewall that provides comprehensive, proactive, application-layer protection against both generalized and targeted attacks. Available as a software module on BIG-IP LTM, ASM employs a positive security model (deny all unless allowed) combined with signature-based detection.

#### WebAccelerator

WebAccelerator speeds Web transactions by optimizing indivi

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
