The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of FEC Resources, Inc. business.

### **About FEC Resources, Inc.**

FEC Resources Inc. engages in the acquisition, exploration, and development of natural resource and mineral properties. The company pursues exploration and development opportunities for oil, natural gas, iron ore, gold, and coal in the Philippines.

#### Properties

The company owns a 25.84% equity interest in Forum Energy Plc (FEP). The principal asset of FEP is the oil and gas rights approximately 8,800 square-kilometer block located in the South China Sea. The holdings of FEP are based mainly in the Philippines and include a 70% interest in Service Contract 72 (SC 72), an offshore license which contains the Sampaguita Gas Field, as well as additional oil and gas leads; 66.7% interest in SC 40 (Cebu), a service contract which contains the onshore Libertad Gas Field and Maya discovery and other prospects; and 100% interest in Forum Energy Philippines Corporation, a company with varying interests in 9 offshore fields west of the Philippines, including a 2.27% interest in the producing Galoc Field.

The SC72 concession (Reed Bank) is located in the South China Sea west of Palawan Island. The SC 40 (Cebu) contract area is located in the Visayan Basin in the central part of the Philippines archipelago. The license area covers the northern area of Cebu

Island and the adjacent offshore areas in the Central Tanon Strait and Visayan Sea. The Libertad Gas Field is situated in northern Cebu, north of Cebu City. The Maya area is located on the north eastern tip of Cebu Island.

The company also holds 35% interest in Metalore Mining Corporation (MMC), a Philippine-based company that holds the rights to a 64 hectare license. It also owns a 40% interest in mineral production and sharing agreement (MPSA) 148, a gold exploration project, through Lascogon Mining Corporation in the Philippines.

## History

The company was founded in 1982. It was formerly known as Tylox Corporation and changed its name to Tracer Petroleum Corporation in 1991. Further, it changed its name to Forum Energy Corporation in 2003; and to FEC Resources, Inc. in 2005.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
