The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Fellows Energy Ltd. business.

About Fellows Energy Ltd.

Fellows Energy, Ltd. engages in the exploration, acquisition, development, production, and sale of natural gas, crude oil, and natural gas liquids from conventional reservoirs with in the western the United States.

Properties

Carbon County Project, Utah

The company has an option agreement to purchase a gas field in Carbon County, Utah. The field includes 5,953 gross acres (2,440 net acres), with four producing gas wells, and an additional four shut-in wells. The acquisition included an associated gas gathering system and a 6 mile pipeline and compression facility servicing the project and adjacent production.

Weston County Project, Wyoming

The Weston County play focus is initially on the development of a conventional oil field followed by exploration for conventional oil reservoirs in the Dakota and Minnelusa on 19,290 gross and 9,645 net acres. The company acquired an option to purchase a

100% working interest consisting of 19,290 acres of oil and gas.

Carter Creek Project, Wyoming

The Carter Creek Project targets an unconventional play for oil on 14,196 gross and 9,959 net acres from fractured shales in the Niobrara and Mowry. The company acquired a 100% working interest of 10,678 acres of Carter Creek Project in the southern Powder River Basin of Wyoming. The Carter Creek Project offers large-scale reserve from a section of over-pressured Lower Cretaceous zones, including the Niobrara, Turner, Mowry, Muddy, and the normally pressured Dakota formations.

Gordon Creek Project, Utah

The company acquired an option to purchase 5,242 acres (3,184 net) of Gordon Creek Project located in Carbon County, eastern Utah. The Gordon Creek project targets natural gas reserves in two unconventional plays, including the Cretaceous Ferron sandstone play and the Cretaceous Emery coal bed natural gas play.

Bacaroo Project, Baca County, Colorado

The Bacaroo Project targets conventional oil and gas reserves from prolific reservoirs in the Pennsylvanian Topeka, Lansing-Kansas City, and Morrow formations, as well as the Mississippian Keyes formations.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
