Abstracts

Fibrocell Science, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Fibrocell Science, Inc. and its competitors. This provides our Clients with a clear understanding of Fibrocell Science, Inc. position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about Fibrocell Science, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Fibrocell Science, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Fibrocell Science, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Fibrocell Science, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Fibrocell Science, Inc. business.

About Fibrocell Science, Inc.

Fibrocell Science, Inc., an aesthetic and therapeutic development stage biotechnology company, focuses on developing skin and tissue rejuvenation products.

The company's clinical development product candidates are designed to improve the appearance of skin injured by the effects of aging, sun exposure, acne, and burn scars with a patient's own, or autologous, fibroblast cells produced by its proprietary Fibrocell process. Its clinical development programs encompass both aesthetic and therapeutic indications.

Aesthetic Development Programs

The company's aesthetics development programs include product candidates to treat targeted areas or wrinkles and to provide full-face rejuvenation that includes the improvement of fine lines, wrinkles, skin texture and appearance. Its therapeutic development programs are designed to treat acne scars, restrictive burn scars and dental papillary recession. All of its product candidates are non-surgical and minimally invasive.

Nasolabial Fold Wrinkles: The company completed a Phase III clinical trial for the

treatment of nasolabial folds/wrinkles.

Full Face Rejuvenation: The company completed a Phase II clinical trial to treat fine lines and wrinkles for the full face using azficel-T, an autologous cell therapy.

Therapeutic Development Programs

Acne Scars: The company completed a Phase II/III clinical trial for Acne Scars.

Restrictive Burn Scars: It is a Phase II clinical trial program for the use of azficel-T for restrictive burn scar patients.

Dental Study: It is a Phase II open-label dental trial for the treatment of interdental papillary insufficiency.

Agera Skincare Systems

The company, through its subsidiary, Agera Laboratories, Inc., also develops and markets a skin care product line primarily in the United States and Europe. These skincare products can be packaged to offer anti-aging, anti-pigmentary and acne treatment systems.

Significant Events

In November 2010, Fibrocell Science, Inc. had signed an agreement to establish a joint venture (JV) with Hefei Meifu Bio-Tech Limited Co. (Meifu) for developing and marketing autologous fibroblast therapies in Asia, excluding Japan. The JV would be called Fibrocell Science Asia Co. Ltd. Under the terms of the agreement, Fibrocell would provide access to its intellectual property, clinical data, and manufacturing processes.

History

The company was founded in 1995. It was formerly known as Isolagen, Inc. and changed its name to Fibrocell Science, Inc. in 2009.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need

2-3 days to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
