Such information creates your awareness about principal trends of Fidelis Energy, Inc. business.

About Fidelis Energy, Inc.

Fidelis Energy, Inc. engages in the identification, acquisition, and development of working interests in smaller and underdeveloped oil and gas projects in California, Texas and Canada.

Properties

Hidalgo Prospect- Texas-Natural Gas

In 2005, the company executed a Lease Purchase and Development Agreement and Joint Operating Agreement with Miramar Petroleum, Inc. on a farm-in with Miramar on the Southeast Hidalgo Prospect, Hidalgo County Texas. The Hidalgo Field produces gas from depths of 6,200 feet to 8,100 feet.

North Franklin Prospect- California-Natural Gas

The project is located in Sacramento County. The company had executed an authority for expenditure (A.F.E.) for the Archer-Wildlands #1 gas well, the next well planned under the overall development plan for the North Franklin project. In 2006, production from its two gas wells, the 'Archer-Whitney #1' and 'Archer-Wildlands #1' totalled 92.443

Mmcf.

Kansas- Gas and Light Oil

In 2005, the company had executed a memorandum of understanding (M.O.U.) to acquire a 25% working interest in a very prospective Kansas oil and gas play from a private company. Fidelis and partners have acquired participation rights in a large data base that includes approximately one million acres, located in central Kansas, covering parts of Ellsworth, Salina, McPherson, Reno, Harvey, Kingman, and Sedgwick counties.

Significant Events

In June 2010, Fidelis Energy, Inc. has entered into a long-term solar module supply agreement with Lagofrio Energy Solutions (LES), a wholly owned subsidiary of TinSol Energy (pty) Ltd. (TSEL). Under the terms of the contract, Fidelis Energy would supply 93 megawatts (MW) of PV Solar modules to TSEL for use in the development and build-out of several solar parks in Africa.

History

Fidelis Energy, Inc. was incorporated in 2000. It was formerly known as Eagle Star Energy, Inc. and changed its name to Fidelis Energy, Inc. in 2004.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
