The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Fidelity Bancorp Inc. business.

About Fidelity Bancorp Inc.

Fidelity Bancorp, Inc. operates as the bank holding company for Fidelity Bank, PaSB that provides various banking services in Pennsylvania.

The company conducts business from 13 full service offices located in Allegheny and Butler counties, 2 of the 5 Pennsylvania counties, which comprise the metropolitan and suburban areas of greater Pittsburgh.

Lending Activities

The company's principal lending activity is the origination of loans secured primarily by first mortgage liens on existing single-family residences in its market area.

Residential Real Estate Lending: The company originates single-family residential loans and residential construction loans, which provide for periodic interest rate adjustments. It also originates fixed-rate, single-family residential loans with terms of 10, 15, 20, or 30 years to provide a range of products to its customers. It also offers a 10-year balloon loan with payments based on 30-year amortization.

Commercial and Multi-family Real Estate Lending: In addition to loans secured by single-

family residential real estate, the company originates, to a lesser extent, loans secured by commercial real estate, and multi-family residential real estate. Its commercial real estate loans are secured by retail stores, suburban office buildings, self-storage centers, and various other commercial properties.

Construction Lending: The company also engages in loans to finance the construction of one-to-four family dwellings. This activity is generally limited to individual units and may, to a limited degree, include speculative construction by developers.

Installment Lending: The company offers various installment loans, including home equity loans and consumer loans. Consumer loans consist of motor vehicle loans, other types of secured consumer loans, and unsecured personal loans. It also makes other types of installment loans, such as savings account loans, personal lines of credit, and overdraft loans.

Commercial Business Loans and Leases: Commercial business loans of both a secured and unsecured nature are made by the company for business purposes to incorporated and unincorporated businesses.

Investment Portfolio

As of September 30, 2010, the company's investment portfolio included securities of the U.S. government and agency; municipal obligations; corporate obligations; mutual funds; FreddieMac preferred stock; equity securities; and trust preferred securities.

Deposits

The company's deposit products include savings accounts, demand deposit accounts, NOW accounts, money market deposit accounts, and certificates of deposit.

History

Fidelity Bancorp, Inc. was founded in 1927.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
