Abstracts

Fidelity National Information Services, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Fidelity National Information Services, Inc. and its competitors. This provides our Clients with a clear understanding of Fidelity National Information Services, Inc. position in the [Software and Technology Services](#) Industry.

The report contains detailed information about Fidelity National Information Services, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Fidelity National Information Services, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Fidelity National Information Services, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main

financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Fidelity National Information Services, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Fidelity National Information Services, Inc. business.

About Fidelity National Information Services, Inc.

Fidelity National Information Services, Inc. provides technology solutions, processing services, and information-based services to the financial services industry. The company offers financial institution core processing, card issuer, and transaction processing services, including the NYCE Network, a national electronic funds transfer (EFT) network.

Segments

The company conducts its operations through three segments, Financial Solutions Group (FSG); Payment Solutions Group (PSG); and International Solutions Group (ISG).

Financial Solutions Group

The Financial Solutions Group focus on providing software and services for the core processing, customer channel, treasury, cash management, and wealth management

operations of its financial institution customers in North America. The company services the core and related ancillary processing needs of North American banks, credit unions, automotive financial companies, commercial lenders, and independent community, and savings institutions. FIS offers a selection of in-house and outsourced solutions to banking customers that span the range of asset sizes.

Core Processing and Ancillary Applications: The company's core processing software applications are designed to run critical banking processes for its financial institution clients, including deposit and lending systems, customer management, and other central management systems. It also offers various services that are ancillary to the primary applications, including branch automation, back office support systems, and compliance support. In addition, its wealth management services offer a set of Internet-enabled services to financial services providers that address the specific needs of the wealthy, affluent, and emerging affluent markets, as well as commercial clients. These solutions address asset and liability aggregation, trust and investment account management, client and regulatory reporting, and employee retirement benefit services. The company also offers an application suite that assists automotive finance institutions in evaluating loan applications and credit risk, and allows automotive finance institutions to manage their loan and lease portfolios.

Channel Solutions: The company's suite of retail delivery applications enables financial institutions to integrate and streamline customer-facing operations and back-office processes, thereby improving customer interaction across all channels (branch offices, Internet, ATM, and call centers). The company's electronic banking services are utilized by approximately 2,100 financial institutions to offer Internet banking services to their customers. Its consumer electronic banking and business Internet banking provide a set of cash management capabilities, enabling customers to manage banking and payments through the Internet, mobile devices, accounting software, and telephone. The company's corporate electronic banking solutions provide commercial treasury capabilities, including cash management services and multi-bank and collection, and disbursement services that address the specialized needs of corporate customers. FIS systems provide accounting and reconciliation for such transactions, serving as the system of record and providing full regulatory compliance, risk assessment, and fraud management tools.

Decision and Risk Management Solutions: The company's decision solutions offer a spectrum of options that cover the account lifecycle from helping to identify qualified account applicants to managing mature customer accounts and fraud. The company's applications include know-your-customer, new account decisioning, new account

opening, account and transaction management, fraud management, and collections. The company's risk management services utilize its proprietary risk management models and data sources to assist in detecting fraud and assessing the risk of opening a new account or accepting a check at either the point-of-sale, a physical branch location, or through the Internet. Its systems utilize a combination of advanced authentication procedures, predictive analytics, artificial intelligence modeling and proprietary and shared databases to assess

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
