About Finotec Group Inc.

Finotec Group Inc., through its subsidiaries, offers financial market trading to professional and retail clients over its Web-based live and real-time proprietary trading system.

The company has three wholly owned companies: Finotec Trading Inc., which involves in marketing, sales, market trading, and facilitation; Finologic Ltd, a financial technology development company; and Fino Consulting Ltd, a financial advisory company. Finotec Trading Inc. owns Finotec Trading UK Limited (FT UK), which acts as a market maker in foreign exchange (Fx) and commodities and futures (CFDs) in the U.K. and Europe and provide investment management services. It also owns Finotec Trading Cyprus Ltd (FTC), which engages primarily in sales and marketing of the company's products.

Operations

Fx and CFD Activities

The company operates an Internet-based brokerage firm for institutional, professional and serious active individual traders in the financial instruments markets, especially foreign currency and CFDs. It offers an electronic trading platform which integrates

strategy trading tools, historical and streaming real-time market data, and direct-access order-routing and execution.

The company has secured various IB (introducing broker) contracts, with investment houses, financial institutions, and high wealth individuals. Its Web site and trading system may be accessed on www.finotec.com. The system also provides a 'demo' trading system and an e-learning center that may be accessed by registering on the Web site.

Technology

The company develops, through its subsidiaries, markets and operates a software system delivering foreign exchange, commodities, and futures (CFDs) investment services to the public through the Internet.

The company markets its services primarily through its subsidiaries that operate call centers and Internet sites. It also intends to promote white-label systems directly to financial institutions, such as commercial banks. The company also provides training in online trading.

Risk Management

In addition, the company operates an internal risk management module that guides the company as to when to hedge positions or not and systems that provide real time management of equity positions and margin requirements. The company also acts as a market maker in relevant jurisdictions.

Brokerage Services

The company, through its subsidiaries, offers online brokerage services, in financial instruments (especially foreign currency and CFDs), using the Forexcash trading platform. Its targeted customer base for brokerage services includes active individual, professional, and institutional traders.

History

Finotec Group, Inc. was founded in 1998.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
