Abstracts

Flex Fuels Energy, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Flex Fuels Energy, Inc. and its competitors. This provides our Clients with a clear understanding of Flex Fuels Energy, Inc. position in the [Utilities](#) Industry.

The report contains detailed information about Flex Fuels Energy, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Flex Fuels Energy, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Flex Fuels Energy, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Flex Fuels Energy, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Flex Fuels Energy, Inc. business.

About Flex Fuels Energy, Inc.

Flex Fuels Energy Inc., a development stage company, engages in developing currency risk mitigation business; and the exploration and discovery of gold, minerals, mineral deposits, and reserves. The company also engages in the development of hand-held electronic diagnostic devices

Operations

Bio-Alternative Medical Devices

In February 2010, the company acquired 63% of the diluted equity in Bio AMD Holdings Limited (Bio-AMD), which is a medical technology company in the point of care (POC) diagnostic space. Bio-AMD owns various patents and patent applications on technologies of hand-held electronic diagnostic devices able to read third party assays. Bio-AMD intends to license these technologies and devices to international manufacturers and distributors.

Initial technologies slated for development by Bio-AMD include advanced digital read-out home pregnancy test; a POC prothrombin time monitor using technology to enable patient based, anticoagulant drug therapy monitoring; a digital strip reader (DSR) able

to perform POC rapid assay tests in the cardiac treatment monitoring market; and an accurate magnetic particle reader (MPR), to perform POC tests for multiple indications.

Malibu Gold Property

The company owns 100% interests in the Malibu Gold Property located approximately 110 km northwest of Vancouver, British Columbia and 75 km north of Sechelt, British Columbia. The Malibu Gold Property consists of 2 MTO mineral claims containing 33 cell claim units totaling 683.445 hectares.

WDX – Currency Risk Mitigating Business

As of December 31, 2009, the company owned 75.66% of WDX Organisation Limited (WDX)I, which is the developer of a technology designed to mitigate currency risk known as the Wocu. The Wocu is a world currency quotation derived by a WDX proprietary algorithm from the currency pair market prices of the world's 20 largest economies, weighted by International Monetary Fund Gross Domestic Product figures of individual countries.

Dispositions

As of December 31, 2009, the company discontinued the operations of the FFE Ltd.

History

Flex Fuels Energy Inc. was founded in 2006.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
