Abstracts

Flextronics International Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Flextronics International Ltd. and its competitors. This provides our Clients with a clear understanding of Flextronics International Ltd. position in the [Computers and Electronic Equipment](#) Industry.

The report contains detailed information about Flextronics International Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Flextronics International Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Flextronics International Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Flextronics International Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Flextronics International Ltd. business.

About Flextronics International Ltd.

Flextronics International Ltd. provides vertically-integrated advanced design and electronics manufacturing services (EMS) to original equipment manufacturers (OEMs).

The company offers services in the following markets: infrastructure, which includes networking, telecom infrastructure, communications and smart grid equipment, such as base stations, core routers and switches, optical and optical network terminal equipment, and connected home products, such as wireless routers, set-top boxes, and DSL/cable modems and metering devices; mobile communication devices, which includes handsets operating on a number of different platforms such as GSM, CDMA, TDMA and WCDMA; computing, which includes products, such as all-in-one PC desktops, notebook and netbook computers, enterprise storage devices and servers; consumer digital devices, which includes products such as home entertainment equipment, game consoles, printers, copiers and cameras; industrial, semiconductor capital equipment, clean technology, aerospace and defense, and white goods, which includes products such as home appliances, industrial meters, in-flight entertainment, robotics, bar code readers, self-service kiosks, solar and wind energy market equipment and test equipment; automotive and marine, which includes products such as navigation instruments, radar components, and instrument panel and radio components; and

medical devices, which includes products such as drug delivery, diagnostic, telemedicine and disposable medical devices.

Service Offerings

Design and Engineering Services: The company offers a range of value-added design and engineering services that are modified to the various markets and needs of customers. These services can be delivered by three primary business models: Contract Design Services (CDS), where the customer purchases engineering and development services on a time and materials basis; Joint Development Manufacturing (JDM) services, where Flextronics's engineering and development teams work jointly with customers' teams to ensure product development integrity, manufacturing handoffs, and faster time to market; and Original Design and Manufacturing (ODM) services, where the customer purchases a product that it designs, develops, and manufactures.

The company's design and engineering services are provided by global, market-based engineering teams and cover a range of technical competencies:

System Architecture, User Interface and Industrial Design: The company helps customers design and develop products that address the needs of the user and the market. These services include product definition, analysis and optimization of performance and functional requirements, 2-D sketch level drawings, 3-D mock-ups and proofs of concept, interaction and interface models, detailed hard models and product packaging.

Mechanical Engineering, Technology, Enclosure Systems, Thermal and Tooling Design: The company offers mechanical, structural, and thermal design solutions for enclosures that encompass a range of plastic, metal and other material technologies.

Electronic System Design: The company provides electrical and hardware design for products ranging in size from small handheld consumer devices to large high-speed, carrier-grade, telecommunications equipment, which includes embedded microprocessor, memory, digital signal processing design, high-speed digital interfaces, analog circuit design, power management solutions, wired and wireless communication protocols, display imaging, audio/video, and radio frequency (RF) system and antenna design.

DFM Reliability and Failure Analysis: The company provides design for manufacturing,

test, and reliability services tools and databases that have been developed internally.

Component Level Development Engineering: The company has developed engineering competencies for product development and lifecycle management in support of various component technologies. These components also form a part of vertical integration strategy and include power supplies and power solutions, LCD and Touch Interface Modules, Camera Modules, and PCB and Interconnection Technologies, both rigid and flexible.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
