Abstracts

Forestar Group Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Forestar Group Inc. and its competitors. This provides our Clients with a clear understanding of Forestar Group Inc. position in the [Real Estate](#) Industry.

The report contains detailed information about Forestar Group Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Forestar Group Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Forestar Group Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Forestar Group Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Forestar Group Inc. business.

About Forestar Group Inc.

Forestar Group Inc. engages in the real estate and natural resources businesses in the United States.

Segments

The company manages operations through three business segments: Real estate, Mineral resources, and Fiber resources.

Real Estate segment

The company, in its Real Estate segment, conducts an array of project planning and management activities related to the acquisition, entitlement, development and sale of real estate, primarily residential and mixed-use communities. The company owns and manages its projects either directly or through ventures.

The company has real estate in nine states and 12 markets encompassing approximately 251,000 acres, including 188,000 acres located in an area around Atlanta, Georgia, with the balance located primarily in Texas. The company's development projects are principally located in the major markets of Texas.

The company has approximately 31,000 acres in the entitlement process, which includes obtaining zoning and access to water, sewer and roads. It has approximately 16,000 acres entitled, developed and under development, comprised of land planned for approximately 30,000 residential lots and 2,300 commercial acres.

Products: The company develops lots for single-family homes and commercial tracts that are ready for construction of buildings for retail, multifamily, office, industrial or other commercial uses. The company sells residential lots primarily to national and regional homebuilders and, to a lesser extent, local homebuilders. The company has 75 entitled, developed or under development projects in seven states and 11 markets, principally in the major markets of Texas, encompassing approximately 16,000 remaining acres, comprised of land planned for approximately 30,000 residential lots and approximately 2,300 commercial acres. The company has approximately 2,300 acres of entitled land designated for commercial use.

One of its significant mixed-use projects is Cibolo Canyons in the San Antonio market area. Cibolo Canyons is a 2,100 acre mixed-use development planned to include approximately 1,700 residential lots. At Cibolo Canyons is the JW Marriott San Antonio Hill Country Resort & Spa, a 1,002 room destination resort and two PGA Tour Tournament Players Club (TPC) golf courses designed by Pete Dye and Greg Norman.

Mineral Resources segment

The company leases its oil and gas mineral interests to third parties for the exploration and production of oil and gas, principally in Texas and Louisiana.

Products: The company owns oil and gas mineral interests on approximately 620,000 net acres in Texas, Louisiana, Georgia, Alabama, California and Colorado. The company engages in leasing certain portions of these oil and gas mineral interests to third parties for the exploration and production of oil and gas. Of its 620,000 net acres of oil and gas mineral interests, approximately 480,000 net acres are available for lease. The company has approximately 140,000 net acres leased for exploration activities, of which 27,000 net acres are held by production from 470 oil and gas wells that are owned and operated by others.

East Texas and Gulf Coast Basins: The company has approximately 252,000 net mineral acres in East Texas and 144,000 net mineral acres in Louisiana located within the East Texas and Gulf Coast Basins. Of these reservoirs, the company has mineral

interests in and around production trends in the Wilcox, Frio, Cockfield, James Lime, Pettet, Travis Peak, Cotton Valley, Austin Chalk, Haynesville Shale, and Bossier formations.

Fort Worth Basin: The company has approximately 1,000 net mineral acres in the Fort Worth Basin. This basin contains various oil and gas producing formations consisting of conventional, unconventional, and tight sand reservoirs. Of these reservoirs, the company has mineral interests in and around the Barnett Shale.

Alabama & Georgia: The company has approximately 42,000 net mineral acres in Alabama and 180,000 net mineral acres in Georgia. It has approximately 2,000 acres under lease in Northeastern Alabama. The company has water interests in approximately 1.6 million acres, including a 45 percent nonparticipating royalty interest in groundwater produced or withdrawn for commercial purposes or sold from approximately 1.4 million acres in Texas, Louisiana, Georgia and Alabama.

Fiber Resources segment

The company sells wood fiber from portions of its land, primarily in Georgia, and lease land for hunting and other recreational uses.

Products: The company has approximately 227,000 acres of timber on its lands and approximately 18,000 acres of timber under lease. Approximately 213,000 acres of its land, primarily in Georgia, are leased for recreational purposes.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
