The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Forward Industries Inc. business.

About Forward Industries Inc.

Forward Industries, Inc. engages in the design, marketing, and distribution of carry and protective solutions for hand held consumer electronics and other products.

Products

The company designs and markets to its customers' order carry solutions for hand held consumer electronics and other products, including soft-sided carrying cases, bags, clips, hand straps, protective faceplates, and other accessories made of leather, nylon, vinyl, plastic, PVC, and other synthetic fabrics. Its products are used by consumers for carrying or transporting portable electronic and other products, such as blood glucose monitoring kits, cellular telephones, bar code scanners, GPS and location devices, cellular telephones, laptop computers, MP3 players, firearms, sporting and recreational products, and aeronautical products. Its carrying cases are designed to enable these devices to be stowed in a pocket, handbag, briefcase, or backpack or clipped to a belt or shoulder strap, or strapped to an arm, while protecting the consumer electronic or other product from scratches, dust, and mishandling.

Diabetic Products

The company sells carrying cases for blood glucose diagnostic kits directly to original equipment manufacturers (OEMs) (or their contract manufacturers) of these electronic, monitoring kits made for use by diabetics. The OEM customer or its contract manufacturer packages its carry cases 'in box' as a custom accessory for the OEM's blood glucose testing and monitoring kits. The kits include a small, electronic blood glucose monitor, testing strips, lancets for drawing a drop of blood and its carrying case, customized with the manufacturer's logo and designed to fit and secure the glucose monitor, testing strips, and lancets in separate straps, pouches, and holders.

Other Products

The company also sells carrying solutions to OEMs for a range of other portable electronic and other products, including bar code scanners, GPS and location devices, cellular telephones, laptop computers, MP3 players, firearms, sporting and recreational products, and aeronautical products on a made-to-order basis that are customized to fit the products sold by its OEM customers.

Markets

The company sells its products in the Asia Pacific Region, consisting of Australia, New Zealand, Hong Kong, Taiwan, China, South Korea, Japan, Singapore, Malaysia, Thailand, Indonesia, India, the Philippines, and Vietnam; the Americas, including north, central, and south America; and Europe.

History

Forward Industries, Inc. was founded in 1954.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
