company's decision-making processes.

In the part that describes Fresenius SE competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Fresenius SE business.

## **About Fresenius SE**

Fresenius AG, a global health care company, provides products and services for dialysis, hospital, and medical care of patients at home. In addition, the company focuses on hospital management, as well as on engineering and services for hospitals and the pharmaceutical industry. The company operates in three segments: Fresenius Medical Care, Fresenius Kabi, and Fresenius ProServe.

### **Fresenius Medical Care**

Fresenius Medical Care AG serves as an integrated provider of products and services for individuals undergoing dialysis because of chronic kidney failure. Through its network of approximately 1,630 dialysis clinics in North America, Europe, Latin America and Asia-Pacific, Fresenius Medical Care provides Dialysis Treatment to approximately 125,900 patients around the globe. Fresenius Medical Care also provides Dialysis Products, such as hemodialysis machines, dialyzers and related disposable products. On May 4, 2005, Fresenius Medical Care AG announced that it has entered into an agreement to acquire Renal Care Group, Inc., a dialysis service provider.

The DiaSafe filter, the On-line Clearance Monitor, which is used to monitor the vascular access and the Twister also developed. DiaSafe is used to produce ultrapure dialysis fluid during hemodialysis and minimizes the risk of infection through dialysis. Twister

offers blood flow monitoring during treatment.

**Haemodialysis:** The company offers machines for haemodialysis, haemodiafiltration, haemofiltration, acute dialysis, plasmafiltration; Low-Flux dialysers (Fresenius Polysulfon); High-Flux dialysers (Fresenius Polysulfon); FX-class dialysers (Helixone); Haemofilters for acute and chronic renal replacement therapy; Plasmafilters; Dialysis fluid filters; Tubing systems; Dialysis cannulae; Dialysis fluids; Dialysis concentrates (liquid, dry); Haemofiltration solutions; Irrigation solutions; Disinfectants; Water treatment systems; Analysis devices; and Data management systems.

**Peritoneal dialysis:** The company offers machines and tubing systems for Automated Peritoneal Dialysis (APD); Peritoneal dialysis solutions; CAPD systems; CAPD double chamber systems; Peritoneal dialysis catheters; and Accessories.

**Dialysis care:** The company offers Dialysis clinics for chronic haemodialysis treatment; Acute in-patient dialysis treatment; and Training (haemodialysis and peritoneal dialysis).

**Spectra Renal Management:** The company offers Laboratory and diagnostic dialysis-related services; Data management; and Managed care services for dialysis patients.

**Adsober technology:** The company offers LDL apheresis: DALI system; and Immunoadsorption: ProSORBA system and ImmunosORBA system.

## Fresenius Kabi

Fresenius Kabi engages in Infusion Therapy and Clinical Nutrition in Europe and in its major countries of Latin America and Asia Pacific. Fresenius Kabi's core product range includes infusion solutions for fluid substitution, blood volume replacement, intravenously administered drugs, as well as parenteral and enteral nutrition. Furthermore, the company offers medical devices for the application of Infusion Therapy and Clinical Nutrition and Infusion Management. In addition, Fresenius Kabi is active in the field of Transfusion Technology, supplying blood processing systems, as well as blood bags and filters.

Fresenius Kabi's portfolio comprises three business units that include:

**Infusion therapy:** Products for fluid and blood-volume replacement, as well as intravenously administered drugs, such as anesthetics for general anesthesia, as well as medical devices for the administration of infusion therapies and for infusion

management.

The company offers basic solutions; solutions for osmotic therapy; irrigation solutions/urology; infusion solutions for blood volume replacement and haemodilution therapy; I.V. anaesthetics; I.V. anti-infective drugs and disinfectants; I.V. catecholamines; and I.V. packaging systems.

Clinical Nutrition: Parenteral (intravenous) and enteral (via sip and tube feeds) nutrition for patients who are unable to not allowed to eat any or sufficient normal food, as well as medical devices for the administration of nutrition therapies.

The co

The above Company Fundamental Report is a half-ready report and contents are subject to change.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
