Abstracts

Fresh Water Technologies Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Fresh Water Technologies Inc. and its competitors. This provides our Clients with a clear understanding of Fresh Water Technologies Inc. position in the [Wholesale and Distribution](#) Industry.

The report contains detailed information about Fresh Water Technologies Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Fresh Water Technologies Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Fresh Water Technologies Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Fresh Water Technologies Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Fresh Water Technologies Inc. business.

About Fresh Water Technologies Inc.

Freshwater Technologies, Inc., a development stage company, engages in the distribution and marketing of water treatment products to local distributors and retailers for industrial, manufacturing productivity, agricultural, commercial, and household applications. The company also offers a line of accessories, replacement parts, and services compatible with its water treatment systems.

Products

The company offers three product lines consisting of drinking water treatment products and water activation products.

Drinking Water Products

The company's drinking water treatment products feature Sterilight branded ultra violet products that are supplied to its company by VIQUA, a manufacturer based out of Guelph, Ontario, Canada. Sterilight branded ultraviolet water treatment systems incorporate ultraviolet light energy that eradicates harmful microbiological contaminants, such as bacteria, viruses, and parasites in drinking water. The drinking water products

that the company distributes incorporate ultraviolet technology to sterilize and clean drinking water. VIQUA's ultraviolet products range from 1-2 gallons per minute weighing 11 lbs. to larger units that can treat 1,000 gallons per minute weighing 1,100 pounds.

The company's drinking water treatment products also feature the ozone water treatment systems of Ozocan Corporation for the countries of Argentina, Chile, Peru, Costa Rica, and Panama. Used in various water treatment applications, Ozocan's products treat municipal and industrial drinking water and wastewater and are used in bottled water applications, as well as treating air conditioning and cooling tower installations.

Water Activation Products

The company's water activation products are designed for use in commercial and industrial boilers and refrigeration systems without the use of chemicals, as well as in certain manufacturing operations and agricultural greenhouse facilities. Its water activation products are supplied to its company by ELCE International Corp., the worldwide distributor of ELCE products invented by Nihon Jisui Co. Ltd. of Japan. ELCE International Corp. supplies the company with its own FW branded water activation technology. FW water activation treatment systems remove rust, scale, and corrosion within heating and cooling systems. The FW water activation units, which range in water flow capacity from 11 liters per minute to approximately 2,000 liters per minute, change water properties physically without removing or adding chemical impurities, ions or minerals. The company supplies approximately 15 different sizes of FW water activation devices. Its water activation products process water physically without removing or adding chemical impurities.

Markets

The company markets its products through local distributors and agents in Argentina, Chile, Columbia, Costa Rica, Panama, and Peru.

History

Freshwater Technologies, Inc. was founded in 2005.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need

2-3 days to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
