The company, in 2007, acquired 100 percent of the outstanding shares of Bank of Salem. Bank of Salem, an Oregon chartered commercial bank headquartered in Salem, Oregon, provided commercial real estate and business lending products and related services through three locations in Portland, Salem and Tigard, Oregon.

Banking Services

The company provides a range of consumer banking services including savings accounts, checking accounts, installment and commercial lending, safe deposit facilities, time deposits and other consumer and business related financial services. In addition to consumer-oriented activities, the company maintains a commercial lending program, servicing individuals and businesses headquartered in its principal market areas.

Lending Activities

Real Estate Loans: Real estate loans comprise commercial real estate term loans, construction loans, land development loans, completed lot loans and residential 1-4 family loans. The construction loan portfolio is comprised of two types: loans for construction of residential and commercial income-producing properties that have terms of less than two years; loans for construction of single-family speculation and owner-occupied properties that generally have terms of one year or less.

The company's commercial real estate term loans finance the purchase and/or ownership of income producing properties. These loans mature in one to ten years with a payment amortization schedule ranging from 15 to 25 years. Interest rates may be fixed or variable. The interest rates on fixed rate loans reprice between the first and fifth year.

Land development loans are used for either residential or commercial purposes. These loans have terms of one year or less and typically bear an interest rate that floats with its base rate.

Residential 1-4 family loans include various types of loans for which residential real property is held as collateral. These loans, collateralized by 1-4 family residences, typically have maturities between one and five years with payment amortization schedules ranging from 10 to 20 years. Residential 1-4 family loans are written with both fixed and variable rates.

The company also originates and sells residential 1-4 family loans into the secondary market. The company offers various products for refinancing and purchases and is approved to originate FHA and VA loans. The majority of loans originated in 2008 were fixed rate single-family loans. Servicing is sold with the loan.

Commercial and Industrial Loans

This category of loans includes both commercial and industrial loans used to provide working capital or for specific purposes, such as to finance the purchase of fixed assets, equipment or inventory. Commercial loans include lines of credit and term loans. Commercial term loans are made to finance the acquisition of fixed assets, refinance short-term debt originally used to purchase fixed assets or, in rare cases, to finance

a business purchase. They may be collateralized by the asset being acquired or other available assets.

Installment Loans

The company provides loans for consumer use, including: auto loans, boat loans, home improvement loans, revolving lines of credit, VISA credit cards and other loans made by banks to individual borrowers. These loans have terms ranging from one to five years, with up to 20-year amortizations and are written with both fixed and variable rates.

Investment portfolio

The company's investment portfolio includes investments in Equities, U.S. Treasuries, U.S. Agencies, Corporate securities, Mortgage-backed securities, and Municipal securities.
