## Abstracts

Frutarom Industries Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Frutarom Industries Ltd. and its competitors. This provides our Clients with a clear understanding of Frutarom Industries Ltd. position in the [Chemical](#) Industry.

The report contains detailed information about Frutarom Industries Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Frutarom Industries Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Frutarom Industries Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Frutarom Industries Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Frutarom Industries Ltd. business.

### **About Frutarom Industries Ltd.**

Frutarom Industries Ltd. engages in the development, manufacture, marketing, and sale of flavors and fine ingredients used in the production of food and beverage, flavors and fragrances, pharma/nutraceutical, personal care and other products.

#### Divisions

The company operates principally in two divisions, each of which is a main field of activity and reports as a business sector: Flavors Division and Fine Ingredients Division.

#### The Flavors Division

Frutarom's Flavors Division develops, produces, markets and sells value added sweet and savory flavors and Food Systems used mainly by manufacturers of food and beverages and other consumer products. The company develops for its customers different flavors, most of which are modified, and develops new flavors in order to meet changing consumer preferences and customer needs. Flavors products are sold principally to producers of prepared foods, beverage, dairy, bakery, meat and fish, confectionery and pharmaceutical products.

The company divides the activities of the Flavors Division into two main categories: flavor compounds and food systems.

**Flavor Compounds:** The Flavors Division offers a variety of flavor compounds designed to enhance or create new tastes or to mask certain tastes in processed foods and beverages to which they are added. The flavor compounds produced by the company are used primarily as ingredients in consumables manufactured by food and beverage producers, such as soft drinks and juices, dairy and ice cream products, baked goods, confectionery, chewing gum, and a variety of savory foods including snacks, soups and salad dressings, as well as meat, meat substitutes and fish.

The company offers natural, organic, nature identical and artificial flavor compounds. Natural flavor compounds are manufactured from natural ingredients, such as natural extracts and essential oils. Nature identical and artificial compounds are produced using synthetic ingredients. Some of Frutarom's flavor products use fine ingredients manufactured by the Fine Ingredients Division for exclusive in house use.

The company produces savory flavor compounds for flavored potato chips, crackers and other savory snacks. Flavor products for dried prepared food products manufactured by Frutarom include savory flavor compounds containing seasonings for instant soups, dried pasta sauces and other dry prepared food products. Further, Frutarom produces savory flavors, seasonings and specialty functional ingredients for meat, poultry and fish processors, as well as a line of flavor compounds for products utilizing meat substitutes, designed to help impart meat flavor to vegetarian preparations.

The company sells its flavor compounds in stable liquid, paste, powder, emulsion and granulated form and sometimes bundled with stabilizers and emulsifiers (ingredients which alter texture and other properties of the products to which they are added).

**Food Systems:** The Flavors Division produces a variety of food systems. These food systems include sauces, ripples, fillings and other preparations made from fruit, vegetables and other natural ingredients used in a range of food products, such as dairy (yogurts, ice cream, chilled desserts, butter and cheese), sweet and savory baked products, 'ready to eat' meals and other convenience food products.

The company designs food systems with special characteristics, such as specific flavor and/or functional food qualities, high speed filling capabilities (allowing the food system to be integrated into the end product), freeze-thaw stability (allowing a product to be

frozen and defrosted without affecting its consistency, structure or palatability) and high volume fruit integrity (containing a high percentage of fruit).

The company offers a variety of savory vegetable based preparations for applications such as pizza toppings, filled breads, pasta fillings and other prepared meal products. It also offers a variety of sweet fruit, vanilla, chocolate and toffee preparations and sauces, low calorie sauces and fruit preparations, which can include functional food ingredients.

The Flavors Division's customers are primarily food and beverage

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
