Abstracts

Fuji Electric Holdings Co., Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Fuji Electric Holdings Co., Ltd. and its competitors. This provides our Clients with a clear understanding of Fuji Electric Holdings Co., Ltd. position in the [Electrical Equipment Industry](#).

The report contains detailed information about Fuji Electric Holdings Co., Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Fuji Electric Holdings Co., Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Fuji Electric Holdings Co., Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Fuji Electric Holdings Co., Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Fuji Electric Holdings Co., Ltd. business.

About Fuji Electric Holdings Co., Ltd.

Fuji Electric Holdings Co., Ltd. engages in the manufacture and sale of electrical equipment in Japan.

Segments

The company conducts its operations primarily through three business segments: Energy and Electric Systems Group, Electronic Devices Group, and Retail Systems Group.

Energy and Electric Systems Group

The Energy and Electric Systems Group engages in the development, manufacture, and marketing of equipment and systems related to social infrastructure in the industrial, public works, energy and transportation fields, and the provision of related services. Its product portfolio includes drives, such as drive systems, general-purpose inverters, servomotor systems, motors, uninterruptible power supplies, transport equipment and systems; automation, which includes sensors, information systems, instrumentation plant systems, industrial instruments, controllers, radiation control systems, an energy

solutions; industrial plant engineering, including industrial power supplies, electrical machinery equipment for facilities, and cleanroom facilities; electric power systems, such as thermal power plant equipment, hydraulic power plant equipment, and nuclear-power-related-equipment; plant facility construction, which includes electrical equipment installation work; and electric distribution and control components, such as magnetic contactors, manual motor starters, pushbuttons and indicator lights, molded-case circuit breakers, earth-leakage circuit breakers, high-voltage vacuum circuit breakers, high/low voltage fuses, gas detectors, and energy management equipment.

Electronic Devices Group

The Electronic Devices Group engages in the development, manufacture, and marketing of semiconductor, storage, and photoconductive drums. Its product portfolio comprises semiconductors, including power ICs, insulated gate bipolar transistor (IGBT) modules, power discrete devices, hybrid devices, and pressure sensors; magnetic disks, including aluminum and glass magnetic disks, and aluminum substrates; and imaging devices, such as photoconductive drums and peripheral imaging devices.

Retail Systems Group

The Retail Systems Group engages in the development, manufacture and marketing of vending machines, cold-chain equipment, and retail information systems, and provision of related services. This segment supplies a range of solutions, including vending machines and food service equipment, which includes vending machines, beverage dispensers, and tea servers; currency handling systems, such as coin mechanisms and bill validators, automatic change dispensers, and contactless IC card systems; and cold-chain equipment, which includes freezing and refrigerated showcases, energy-saving systems for retail premises, and modularized store construction systems.

Others

The Others segment primarily engages in the real estate operations and offers insurance agency services, travel agency services, financial services, printing and information services, research and development, personnel and administration, accounting, staffing services, and intellectual property services.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
