Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Fuji Heavy Industries Ltd. business.

About Fuji Heavy Industries Ltd.

Fuji Heavy Industries Ltd. engages in the production and sale of automobile products.

Segments

Operations in the company's network of 102 subsidiaries and 9 affiliated companies were conducted under four main business divisions: the Automobiles division, the Aerospace division, the Industrial Products division, and the Other division.

Automobiles division: Automobiles division's main products include Legacy, Impreza, Forester, Tribeca, Stella, R1, R2, Pleo, and Samber.

Industrial Products division: Industrial Products division's main products include robin engines, power generators, and pumps.

Aerospace division: Aerospace division's main products are aircraft and parts of space-related devices.

Other division: Other division's main products are garbage collection vehicles, specialized vehicles, and real estate lease.

Strategic Alliances

Alliance with the Toyota Group: The company, in April 2008, reached an agreement with Toyota Motor Corporation (Toyota) and Daihatsu to build a new cooperative framework for vehicle development and production. The agreement has three main components: joint development with Toyota of the compact FR (front engine, rear-wheel drive) sporty car, to be marketed by both companies; supply of compact cars to FHI by Toyota on an OEM basis; and supply of minicars to FHI by Daihatsu on an OEM basis.

Joint Development and Marketing with Toyota: The company and Toyota would jointly develop the compact FR sporty car. The compact FR sporty car would be based on a new platform equipped with a boxer engine, a core Subaru technology.

In November 2009, Fuji Heavy Industries Ltd. and Sumitomo Corp. announced the joint development of a cleaning robot for office buildings. The robot is equipped with sensors so it can move about the building and vacuum dirt and dust while avoiding obstacles. The robot is designed as a small machine measuring just 50 x 45 x 80cm so it can maneuver along even narrow paths. In addition to sales, the companies are also considering leasing the robot.

History

Fuji Heavy Industries Ltd. was founded in 1917.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
