The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Fundtech Ltd. business.

About Fundtech Ltd.

Fundtech Ltd. provides financial transaction processing software solutions for financial institutions in Israel and internationally.

The company's solutions are grouped into four categories: payment processing; bbb; electronic invoice presentment and payments; and cash management products. The first three categories are transaction processing solutions, which enable banks to automate the payment and settlement (inclusive of foreign exchange settlements) processes and provide real-time transaction processing capabilities and electronic presentment capabilities to financial institutions and their customers. The fourth category, cash management products, enable corporate clients to communicate with their financial institutions for the purpose of initiating payments, making inquiries, and managing their activities with the financial institutions.

Products and Services

The company's products and related services are designed to integrate elements of the electronic payments cycle. Its products facilitate various aspects of the electronic payments and banking cycle, including payment initiation, electronic balance reporting, account reconciliation, real-time account balance verification, and other auditing and

reporting functionality. In addition, its products offers graphical user interfaces.

The company provides products and services that link banks to domestic and international payment networks. In the United States, its products connect banks to the Federal Reserve System's FedLine, which has approximately 7,500 banks connected. On a global basis, the company provides banks with the capability to link to the SWIFT network for communicating cross-border transactions. SWIFT has approximately 7,000 banks in approximately 200 countries connected to their global network. The company is also a provider in global settlements through the CLS Bank's Continuous Linked Settlement System (CLS).

The company's major products include ACCESS Banking, CASHplus, PAYplus USA, PAYplus for CLS, Global PAYplus, Global CASHplus, Global PAYplus-SP, and Recovery Services for disaster recovery service bureau solutions and related services.

PAYMENT SOLUTIONS

PAYplus USA

PAYplus USA is a funds transfer solution used to connect a financial institution's wire transfer room with the Federal Reserve's FedWire system. The company's target market includes banks operating in the United States that do not need a global payment solution, including U.S.-based banks, thrifts, savings and loans and international agency banks operating in the United States.

PAYplus USA supports payment processing, risk management, and regulatory compliance for U.S. financial institutions that utilize the Federal Reserve Bank's FedWire system for high value payments. PAYplus USA also offers the same functionalities for international multi-currency payments of international banks operating in the United States. PAYplus USA provides financial institutions with funds transfer capacity.

Global PAYplus

The company's Global PAYplus provides institutions with a real-time global view of their payments activity. This multi-tiered system addresses the needs of both local and global payment processes. At the local level, Global PAYplus employs a client/server funds transfer payment system that supports both the local payment processing, and risk management and regulatory compliance for the local clearing systems. At the global

level, Global PAYplus aggregates worldwide payment activity. Global PAYplus is a multi-platform system supporting both UNIX and Microsoft operating systems that employ open technology standards. The system features security and multi-currency capabilities.

Global PAYplus-Services Platform

The company's Global PAYplus Services Platform provides financial institutions the ability to implement SOA services in payments, cash management, and financial supply chain within either a pre-configured service platform or in the form of a payments hub integrating the institution's legacy systems into a homogeneous rules-based services platform. The services handle multiple payment types globally and use the payments power of its Global PAYplus s

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
