The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Future Now Group Inc. business.

About Future Now Group Inc.

Future Now Group Inc., through its wholly-owned subsidiaries, provides online marketing optimization services and software solutions. The company's proprietary Persuasion Architecture framework delivers clients 'blueprints' to plan, measure, and improve their online sales and marketing initiatives.

Products

The company sells products and services classified into the following categories: professional services, including custom and packaged consulting; software subscription licensing; content and training; and product sales.

Custom and Productized Consulting Services

These services come in three primary service lines: Conversion Optimization; Persuasion Scenario Analysis; and Marketing Planning & Optimization with Persuasion Architecture. All of these services are specific to the 'flavor' of a site. The services include three 'sizes' per service line. The delivery time frame ranges from less than three months to beyond a full year.

Methodology Software Subscription and Licensing

The company's Persuasion Architecture software suite, referred to as the Minerva Architectural Process (MAP Tool) is available for licensing. This is an option for agencies, as well as medium and larger companies that intend to implement Persuasion Architecture across multiple clients, sites, products and channels. Companies and individuals can also become certified Persuasion Architecture partners under direct licensing and royalty programs.

Persuasion Architecture is a framework, methodology, and software tool set the company developed to plan, build, and optimize persuasive systems on-line and off-line, irrespective of channel. Persuasion Architecture guides clients to document every assumption based on their customers' personal motivations. It then asks the Persuasion Architect to predict the scenarios that those customers would navigate. On-line, Persuasion Architecture uses its Web analytics scenario language (PAXML - Persuasion Architecture XML) to measure scenarios and optimize against those predictions. This scenario optimization process is a six sigma process that allows the Persuasion Architect to understand whether it is the execution or the plan that needs correction.

Content and Training

The company offers various training programs that serve both business-to-business and business-to-consumer operations. These workshops and seminars include Persuasive Online Copywriting, Call to Action: Design with Audience in Mind and Wizards of Web, and online strategy for increased ROI.

Competition

The company's competitors are Organic, Inc., Critical Path, Inc., and Frog Internet Services.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
