Abstracts

FX Energy Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between FX Energy Inc. and its competitors. This provides our Clients with a clear understanding of FX Energy Inc. position in the [Energy](#) Industry.

The report contains detailed information about FX Energy Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for FX Energy Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The FX Energy Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes FX Energy Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of FX Energy Inc. business.

About FX Energy Inc.

FX Energy, Inc. operates as an independent oil and gas exploration and production company with principal operations in Poland.

Exploration, Development, and Production Activities

Polish Exploration Rights

As of December 31, 2009, the company held oil and gas exploration rights in Poland in 9 separately designated project areas encompassing approximately 4.7 million gross acres. The company is the operator in various areas except its core area, the 852,000 gross-acre Fences project area, in which it holds a 49% working interest in approximately 807,000 acres and a 24.5% interest in the remaining 45,000 acres. The Polish Oil and Gas Company (POGC) is the operator. The company owns a 100% working interest in approximately 3.8 million gross acres.

Exploratory Activities in Poland

The company's ongoing activities in Poland are conducted in nine project areas: Fences, Block 246, Block 287, Block 229, Warsaw South, Block 255, Kutno, Edge, and

Northwest. Its drilling activities are focused primarily on the core Fences area, where the gas-bearing Rotliegend sandstone reservoir rock is a direct analog to the Southern North Sea gas basin offshore the United Kingdom. The company is selling gas from wells located in the Fences area and Block 287. It is developing longer-term exploration prospects in the remaining seven areas.

Fences Area: The Fences concession area is 852,000 gross acres (3,450 square kilometers) in western Poland's Permian Basin surrounding POGC's Radlin gas field. The company holds a 49% interest in approximately 807,000 acres and a 24.5% interest in the remaining 45,000 acres in the Fences area. The Rotliegend is the primary target horizon throughout the Fences concession area, at depths from approximately 2,500 to 4,000 meters. In addition, the company has identified what appear to be carbonates in the Zechstein formation, a third type of trap that is known to produce both oil and gas in the region.

Block 246 Concession Area: The company owns a 100% interest in a concession in west-central Poland covering approximately 241,000 acres (975 square kilometers). Block 246 is contiguous with the southwest corner of the Fences concession and appears to have hydrocarbon potential. The company is reprocessing existing two-dimensional (2-D) seismic data to identify possible play-types and prospect leads.

Block 287 Concession Area: The Block 287 concession area is 13,000 acres (52 square kilometers) located approximately 25 miles south of the Fences concession area. The company owns 100% of the exploration rights. Within Block 287 there are three Rotliegend gas wells known as the Grabowka wells. As of December 31, 2009, gross proved reserves of approximately 1.7 Bcf were assigned to the Grabowka-12 well.

Block 255 Concession Area: The Block 255/Wilga concession area in east-central Poland consists of an 82% working interest in approximately 236,000 gross acres (957 square kilometers).

Warsaw South Concession Area: The company owns a 100% interest in various concession blocks in east-central Poland, which cover a total of 638,000 acres (2,581 square kilometers). The Warsaw South concession has various exploration leads, including carboniferous sands with structural or truncation trapping and Zechstein reefs trapped by overlying evaporites and salt.

Northwest Concession Area: The company owns a 100% interest in a concession in west-central Poland covering 0.9 million gross acres. The concession is in Poland's

Permian Basin directly north of POGC's BMB and MLG oil and gas fields.

Kutno Concession Area: The company owns a 100% interest in a concession in central Poland covering 706,000 gross acres (2,856 square kilometers).

Edge Concession Area: The company owns a 100% interest in 4 concessions in north-central Poland covering approximately 881,000 acres (3,567 square kilometers).

Block 229 Concession Area: The company owns a 100% interest in a concession east of its Fences project area covering approximately 233,000 acres (941 square kilometers).

Activities and Assets in the United States

The company has interest in the shallow, oil-producing wells in the Cut Bank Oil Field of Montana. As of December 31, 2009, its U.S. reserves were estimated at 463,000 barrels of crude oil. During 2009, the company drilled one shallow dry hole in Nevada.

Significant Events

On October 07, 2010, the company has signed a definitive joint operating agreement with the Polskie Gornictwo Naftowe I Gazownictwo SA covering operations in the company's 710,000 acre Kutno concession block in central Poland.

History

FX Energy, Inc. was founded in 1989.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
