## Abstracts

Gabriel Technologies Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Gabriel Technologies Corp. and its competitors. This provides our Clients with a clear understanding of Gabriel Technologies Corp. position in the Industry.

The report contains detailed information about Gabriel Technologies Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Gabriel Technologies Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Gabriel Technologies Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Gabriel Technologies Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Gabriel Technologies Corp. business.

### **About Gabriel Technologies Corp.**

Gabriel Technologies Corporation engages in the development, manufacture, and distribution of a security lock system used in the trucking and railroad industry. The company designs, develops, produces, markets and supports a series of improved locking systems under the WAR-LOK name. These locking devices are primarily used for securing shipping containers used by railroads and the trucking industry.

The company's wholly owned subsidiaries include Gabriel Technologies, LLC and Trace Technologies, LLC. In addition, in January 2006, the company acquired 59.8% of Resilent LLC d/b/a Digital Defense Group, a Nebraska limited liability company.

#### Gabriel Technologies, LLC

Products: Gabriel LLC markets four series of War-Lok products which are protectable by certain patent applications and patents with the U.S. Patent & Trademark Office. Gabriel LLC sells the War-Lok series products through a direct sales force and a network of qualified distributors in specific vertical industries. Its products include: The War-Lok t-Series Trucking Security System includes a trailer hasp lock, kingpin lock, tractor air brake lock, trailer glad hand lock, a padlock series and two versions of a trailer security kit and a trailer door hasp, all for use in securing semi-trailers and

tractors; The War-Lok r-Series Railroad Security System includes a special locking pin to be used for rail box cars, and auto cars; The War-Lok i-Series Reusable Intermodal Security System consisted of a reusable lock for intermodal containers, used for hauling freight via truck, rail or marine; and The War-Lok i-Series Intermodal Security System is a locking system for intermodal containers as used in the trucking and rail industry. The system includes a security pin, a barrier box and a proprietary seal removal tool.

With the WAR-LOK Security System there are 260 million key combinations possible and the ability to master key 20,000 different locks. All WAR-LOK internal locking cores are designed with a flat-keyed locking system. All components are made of chrome plated hardened steel, brass or stainless steel. The WAR-LOK is pick resistant, drill resistant and key duplication is rendered improbable.

**Strategic Relationships:** Gabriel LLC has various strategic relationships that aid its business on a daily basis. Gabriel LLC has distribution/resell agreements from seven major partners: Freightliner LLC, Aurora Parts & Accessories, VIPAR Heavy Duty, Davanac Inc., Ford Systems Inc., Ginont Distributing and the Owner-Operator Independent Drivers Association (OOIDA). Gabriel LLC manufactures its WAR-LOK products under contract from multiple sources, principally in China.

#### Trace Technologies, LLC

In addition to the WAR-LOK Security System, the company has established Trace Location Services through its wholly-owned subsidiary, Trace Technologies, LLC, a Nevada limited liability company (Trace). Trace has developed a web-services-oriented platform for the delivery of location based service to its customers. Trace primarily sells its Trace Location Services through licensed value-added resellers and licensed distributors in specific vertical industries.

**Trace Location Services:** Trace has licensed, acquired and developed technology for the operation and management of a location based services network that supports enhanced communication between users and locating devices utilizing Qualcomm's SnapTrack a-GPS technology. Trace Location Services consist of the following components: Trace Asset Tag; Carrier or private communications network (ReFLEX wireless); GPS data from satellites; Assisted-GPS information; and Mapping solution for useful presentation of the position data.

**Strategic Relationships:** Trace has relationships for sales, delivery, installation and support with: USA Mobility, SkyTel, GTES, SAIC, Space Data, S3, CSI Wireless,

SnapTrack (a Qualcomm Company), and GTES.

## Resilent LLC

Resilent has created in its Factor 4 biocard, an identification card that incorporates biometric fingerprints with the ability to self-enroll and authenticate without a need for a central database or any other computer assisted software or hardware. The biocard is a wireless communication device (RFID) with the ability to transmit stored data values.

**Strategic Relationships:** Resilent has established relationships for sales, delivery, and installation of the Factor 4 card with: Net Communications, Inc.; BioDigital Security Pty. Ltd.; FlowSense; Integrated Security Resources; Defense Technologies; Price-Langevin & Associates, Inc.; Smart Security Solutions, Inc.; Access Systems Integration, LLC; Akoura, Inc.; Dahl Communications; Logistic Solutions; Linstar, Inc; and Marcomn Fiberoptics.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
