The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Galaxy Gaming, Inc. business.

About Galaxy Gaming, Inc.

Galaxy Gaming Inc. engages in developing proprietary casino table games and electronically enhanced table game products. The company licenses and/or lease its products to land-based and cruise ship casinos in the United States and internationally. It has an installed base of its products on approximately 1,700 gaming tables.

Segments

The company groups its products into two business segments, Proprietary Table Games and Bonus Jackpot System.

Products

Proprietary Table Games

The company develops and delivers proprietary titles that enhance its casino clients' table game operations. Products in this segment are grouped into two categories which include 'Premium Games', as well as proprietary features added to public domain games such as poker, baccarat, pai gow poker and blackjack table games, also known as 'Side Bets'. Casinos use its proprietary table games in lieu of those games in the

public domain (Blackjack, Craps, and Roulette).

Premium Games: The company offers several stand-alone premium Proprietary Table Games. Its Premium Games include Texas Shootout, Emperor's Challenge, Three Card Split, and Triple Attack Blackjack.

Side Bets: The company offers several Side Bet games. These are used to enhance public domain games. The company's Side Bets include Lucky Ladies, Bonus Blackjack, Suited Royals, Super Pairs, and Lucky 8 Baccarat.

Bonus Jackpot System

In 2008, the company began deployment of a research and development project to create an electronically enhanced table game platform known as the 'Bonus Jackpot System.' In early 2009, the company completed development and manufacturing of the initial version of the Bonus Jackpot System, labeled the 'Milky Way Series.' The company installed its first Bonus Jackpot System – Milky Way into a casino in March 2009.

Besides the data center(s), the Bonus Jackpot System basically consists of two independent sub-systems known as the Bet Tabulator System and TableVision. The Bet Tabulator System is an advanced system installed on gaming tables used to detect players' wagers. TableVision is an electronic display system used on gaming tables to display game information to the players in lieu of traditional static paper or plastic displays. Casinos use TableVision as an enhanced display to generate additional player interest and to promote various aspects of the game offered such as jackpots and bonusing programs. When the Bet Tabulator System and TableVision are used together, the Bonus Jackpot System allows the casino to collect and process data and in turn, offer jackpots and other bonusing schemes to their players as determined by them using the data collected and processed.

Competition

The company's competitors include Galaxy Gaming, Shuffle Master Gaming, DEQ Systems, TCS / John Huxley, Masque Publishing, Prime Table Games, Hop Bet, Gaming Entertainment, Canadian 21 Stook, and Paltronics / AC Coin.

Significant Events

In November 2010, Galaxy Gaming, Inc. announced it has expanded its operations into Connecticut. Collectively, the two casinos operate approximately 730 table games.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
