## **Abstracts**

Gardner Denver Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Gardner Denver Inc. and its competitors. This provides our Clients with a clear understanding of Gardner Denver Inc. position in the [Heavy Machinery](#) Industry.

The report contains detailed information about Gardner Denver Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Gardner Denver Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Gardner Denver Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Gardner Denver Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Gardner Denver Inc. business.

### **About Gardner Denver Inc.**

Gardner Denver, Inc. engages in the design, manufacture, and marketing of engineered industrial machinery and related parts and services. The company also supplies pumps and compressors for original equipment manufacturer (OEM) applications, such as medical equipment, vapor recovery, printing, packaging, and laboratory equipment.

The company also designs, manufactures, markets, and services a group of pumps, water jetting systems and related aftermarket parts used in oil and natural gas well drilling, servicing, and production and in industrial cleaning and maintenance. It also manufactures loading arms, swivel joints, couplers, and valves used to load and unload ships, tank trucks and rail cars. It manufactures reciprocating pumps used in oil and natural gas well drilling, servicing, and production and in loading arms for the transfer of petrochemical products.

### **Segments**

The company operates in two segments: Industrial Products Group Segment and Engineered Products Group Segment.

### **Industrial Products Group Segment**

The Industrial Products Group designs, manufactures, markets, and services the following products: and related aftermarket parts for industrial and commercial applications: rotary screw, reciprocating, and sliding vane air and gas compressors; positive displacement, centrifugal and side channel blowers; and vacuum pumps, primarily serving manufacturing, transportation and general industry and selected OEM and engineered system applications. The company also designs, manufactures, markets, and services complementary ancillary products.

### Engineered Products Group Segment

The Engineered Products Group segment designs, manufactures, markets and services a group of pumps, compressors, liquid ring vacuum pumps, water jetting, and loading arm systems and related aftermarket parts. These products are used in well drilling, well servicing and production of oil and natural gas; industrial, commercial, and transportation applications; and in industrial cleaning and maintenance. This segment also designs, manufactures, markets, and services other engineered products and components and equipment for the chemical, petroleum, and food industries.

Typical applications of the company's Gardner Denver pumps in oil and natural gas production include oil transfer, water flooding, salt-water disposal, pipeline testing, ammine pumping for gas processing, re-pressurizing, enhanced oil recovery, hydraulic power, and other liquid transfer applications. The company's production pumps range from 25 to 300 horsepower horizontally designed pumps. Well servicing operations include general workover service, completions (bringing wells into production after drilling), and plugging and abandonment of wells. The company's well servicing products consist of high-pressure plunger pumps ranging from 165 to 400 horsepower. Gardner Denver also manufactures intermittent duty triplex and quintuplex plunger pumps ranging from 250 to 3,000 horsepower for well cementing and stimulation, including reservoir fracturing or acidizing. Duplex pumps, ranging from 16 to 100 horsepower, are produced for shallow drilling, which includes water well drilling, seismic drilling and mineral exploration. Triplex mud pumps for oil and natural gas drilling rigs range from 275 to 2,000 horsepower.

Liquid ring vacuum pumps, compressors, and engineered systems are used in different applications, including gas removal, distillation, reacting, drying, lifting and handling, filters, priming, and vapor recovery. These applications are found principally in the pulp and paper, industrial manufacturing, petrochemical, power, mining, and oil and gas industries. Nash products are sold primarily through direct sales channels and agents.

Gardner Denver owns five Nash service centers in North America and one each in Brazil, Germany, China and Australia. The Oberdorfer line of fractional horsepower specialty bronze and high alloy pumps for the general industrial and marine markets was acquired as part of the Thomas acquisition. A small portion of Gardner Denver pumps are sold for use in industrial applications.

Through its Thomas operating division, the company operates in medical markets and environmental markets, such as sewage aeration and vapor recovery through the design of custom pumps for OEMs. Other major markets for this division include the printing, packaging, and laboratory markets.

Gardner Denver water jetting pumps and systems are used in various industries, including petrochemical, refining, power generation, aerospace, construction, and automotive. The products are employed in applications, such as industrial cleaning, coatings removal, concrete demolition, and surface preparation.

Gardner Denver's other fluid transfer components and equipment include loading arms, swivel joints, storage tank equipment, dry-break couplers, and tank truck systems used to load and unload ships, tank trucks, and rail cars.

## Competition

Gardner Denver's principal competitors in sales of standard configurations of compressor and vacuum products which are included in the Industrial Products Group include Ingersoll-Rand, Sullair (owned by United Technologies Corporation), Atlas Copco, Quincy Compressor (in the process of being acquired by Atlas Copco), Roots, Busch, Becker, SiHi and GHH RAND (owned by Ingersoll-Rand). The Company's principal competitors in sales of petroleum pump products include National Oilwell Varco and SPM Flow Control, Inc. (owned by The Weir Group PLC). The Company's principal competitors in sales of water jetting systems include NLB Corp. and Hammelmann Maschinenfabrik GmbH (both owned by Interpump Group SpA), Jetstream (a division of Federal Signal) and WOMA Apparatebau GmbH. The Company's principal competitors in sales of other engineered products and equipment are SiHi, OPW Engineered Systems, Civacon (owned by Dover Corporation), FMC Technologies, Schwelm Verladetechnik GmbH (SVT), and Gast (a division of IDEX).

## History

Gardner Denver, Inc. was founded in 1993.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
