Abstracts

Gas Natural Ban S.A. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Gas Natural Ban S.A. and its competitors. This provides our Clients with a clear understanding of Gas Natural Ban S.A. position in the [Utilities](#) Industry.

The report contains detailed information about Gas Natural Ban S.A. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Gas Natural Ban S.A.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Gas Natural Ban S.A. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Gas Natural Ban S.A. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Gas Natural Ban S.A. business.

About Gas Natural Ban S.A.

QuickLogic Corporation operates as a fabless semiconductor company that provides programmable solutions for applications in the mobile, prosumer, and industrial markets. The company designs and sells Customer Specific Standard Products, Embedded Standard Products, field programmable gate arrays, associated design software and programming hardware. The company's ESP and FPGA devices are also standard products that can be programmed to perform desired logic functions.

The company designed its Eclipse II and QuickPCI II products to provide a low power solution for applications requiring medium to small amounts of programmable logic. The company works with processor manufacturers, such as Marvell Technology Group Ltd. and Analog Devices, Inc., and companies that supply storage, networking or graphics components for embedded systems.

Solutions

Customer Specific Standard Products: The company's CSSPs are solutions for power critical or power sensitive applications. Intellectual property incorporated into these solutions include: processor interface; SDIO interface to SD cards, Wi-Fi chipsets, or mobile TV; Serial Peripheral Interface, or SPI, to Wi-Fi or mobile TV; high speed UART

interface to GPS or BlueTooth; IDE and/or CE-ATA interface for use with micro hard disk drives, DVDs or CDs; and, PCI interface to an Ethernet or a Wi-Fi module.

Embedded Standard Products: The company's ESPs combine a function and programmable logic in a single device. Customers in the cellular data card business start with QuickPCI products and add custom logic and software drivers to complete their designs.

Field Programmable Gate Arrays: The company delivers ViaLink-based FPGAs as well as an environment for FPGA designs, including QuickWorks and QuickTools development software and programming hardware. During 2005, the company expanded its capabilities by partnering with Mentor Graphics to provide synthesis and simulation tools, as well as an interface to other electronic design automation, or EDA, tools.

Strategic Relationships

The company formed strategic relationships with Mentor Graphics Corporation, Tower Semiconductor Ltd., Amkor Technology, Inc., Taiwan Semiconductor Manufacturing Company, or TSMC, Unisem (M) Berhard and other companies.

Sales and Marketing

The company sells its products through a network of sales managers, independent sales representatives and point-of-sale distributors in North America, Europe, Japan and Asia. The company has regional sales operations in California, Minnesota, Texas, Massachusetts, New Hampshire and Pennsylvania. The company also has international sales operations in the United Kingdom, Germany, China, Japan, Hong Kong, Taiwan and India.

Manufacturing

The company outsources its wafer manufacturing to TSMC, Tower, Samsung Semiconductor, Inc. and Kawasaki Microelectronics, Inc. The company purchases products from TSMC, Samsung and Kawasaki. The company outsources its product packaging, testing and programming primarily to Amkor Technology, Inc. The company entered into a contractual partnership with Amkor to provide package design services.

Customers

The company serves instrumentation and test, military and aerospace systems, data communications and telecommunications, and video, audio, and graphics imaging markets. Its customers include Curlin Medical; Dot Systems; Honeywell; Medtronic; Teradyne; Tyco Healthcare; BAE Systems; DY-4; General Dynamics; L-3 Communications; Lockheed Martin; Raytheon; RF Communications; Rockwell Collins; Motorola; Nortel; Option Wireless; ElectroSystems; Konami; Quartics; and Samsung.

Competition

The company's competitors include: suppliers of conventional standard products, such as PLX Technology and Oxford Semiconductor; suppliers of CPLDs, including Lattice Semiconductor and Altera; suppliers of FPGAs, particularly Xilinx and Actel; suppliers of ASICs, including Winbond and LSI Logic; and suppliers of embedded processors, such as Freescale Semiconductor.

History

QuickLogic Corporation was founded in 1988.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
